TECLAST T10

Teclast tablet PC

Caution

Thank you for purchasing Teclast product. Please read this manual carefully before using the product to gain maximum benefits.

1. The new battery is only able to achieve the best performance after two to three times fully charge and discharge.
2. To prevent data loss, it is recommended to backup important personal data regularly especially before performing firmware upgrade. We are not responsible for any losses caused by data loss.
3. Please don't disassemble the device by yourself as it has high precision.
4. Please avoid strong beat and splashing water drop on device as it will cause physical damages.
5. Please avoid using the device in the following environments: high temperature, low temperature, humid, dusty, powerful magnetic field and long-term exposure under sunlight. We recommend that you use this product in an environment of 3000 meters above sea level, 0°C to 35°C, and humidity of 5% to 95%.
6. Please only use the battery, charger and accessories which safety is approved by manufacturer. It will be violate the warranty regulations or may be dangerous if you use any other unqualified accessories.

Tips

- Please note the nominal battery duration refers to the longest time can be achieved with minimum power consumption. The real time power duration might be varied in different usage scenario.
- Volume calculation:
 1. The volume calculation is different between hardware manufacturer (1MB=1000KB) but operating system (1MB=1024KB). Such as a 8GB product, software read the capacity $8 \times 1000 \text{MB} \times 1000 \text{KB} / 1024 \text{MB} / 1024 \text{KB} \approx 7.45 \text{GB}$, there will be 0.55GB difference. The larger capacity, the bigger difference.
 2. Android system occupies some of the disk space.
- The nominal battery capacity is count calculating the actual charge amount during charging and discharging, deviation exist by using third-party tools to detect the battery capacity.

Appearance introduction

*Anti Finger Print: The Anti finger print technology makes the TP has good light transmission, smoother feeling, and it is not easy to leave fingerprints.

Charger specification

Output voltage range: 5V-5.2V

Output current range: 2.0A-3A

This product also supports 18W MTK-PE + standard quick charger, in line with Pump Express™ Plus agreement, users can use it if needed.

- Please only use the charger meets above specification.
- Please do a fully recharge per 3 months if you don't use it for long time.
- The charging status will be showed after 30mins if you don't use it for long time.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference,
- (2) and (2) this device must accept any interference received, including
- (3) interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
