

WR5-88G21U-BL Simplified Instructions

Features:

- Full Function Radio Control.
- 2.4GHz Frequency – allows up to 6 vehicles to run at the same time.
- Wheel Alignment – Adjust the wheel alignment located on bottom of vehicle between front wheels.
- Recharge by USB.
- Lights

Features – Operated by the transmitter:

- Forward and Reverse – Pull/Push Trigger.
- Left and Right Steering – Turn Wheel.

Batteries/Recharging Unit (Included):

Transmitter – 2 "AA" batteries.

Vehicle – 7.4V rechargeable Lithium Ion Battery Soft Pack.

Charge by USB:

1. Locate the ON/OFF Switch on underside of vehicle and switch to the OFF position.
2. Remove the small screw securing the Battery Compartment Cover. Save this screw. Open the Battery Compartment cover located on the underside of the vehicle.
3. Locate the Battery Connectors. Using a fingernail, lift the locking tab and gently pull the 2 connectors apart. Use care when extending wires. Do not pull or tug on wires.
4. Plug the Battery Connector into the USB charger.
5. Plug USB cord into any powered USB receptacle.
6. Charging status light will be solid red while battery is charging. When charging is complete, light will turn off.
7. When charging is complete, re-connect the battery, replace compartment cover and secure in place with screw.

The Transmitter:

1. Open Battery Compartment cover located on back of transmitter.
2. Insert 2 "AA" batteries in the battery compartment. Be sure the (+) and (–) are properly matched.
3. Replace battery compartment cover.

Pairing Transmitter to Vehicle:

Before first use and after any time the batteries are replaced, the transmitter must be paired to the vehicle.

To sync transmitter and vehicle, follow the steps below:

1. Correctly install batteries in the transmitter.
2. Place vehicle upside down, and turn Vehicle ON/OFF switch to the ON position. The vehicle is only in sync mode for 30 seconds.
3. Immediately squeeze and hold the forward trigger on the transmitter. Keep holding until wheels move (up to 30 sec.).

The Vehicle:

Locate the ON/OFF switch near Battery Compartment. Switch to the ON position. The vehicle is now ready for use.

Lights:

- When vehicle is powered ON, headlights will glow and tail lights will flash for pairing.
- When vehicle is in motion the headlights and tail lights will glow.

IMPORTANT!

The included Lithium Ion battery soft pack is only PARTIALLY CHARGED prior to shipment and it is recommended the battery be fully charged before first use.

Caution:

Chargers used with the toy are to be regularly examined for damage to the cord, plug, enclosure and other parts, and that, in the event of such damage, the toy must not be used with this charger cable until the damage has been repaired.

Notes:

- Operate the vehicle within 80-100 feet (25-30 meters) range.
- Switch off the toy when not in use.
- Remove "AA" batteries in transmitter when not in use for long periods.
- If vehicle is not functioning properly, make sure batteries in transmitter are fresh and vehicle battery is fully charged.
- Adult supervision recommended.
- Please remove all packaging attachments before giving this toy to your child.
- Do not insert the USB cable into electrical socket outlets.
- Do not use the included USB cable for purpose other than recharging this vehicle.
- To protect the battery and prolong its life, do not overcharge the battery.
- This toy is only to be connected to equipment bearing either of the following symbols:  or .

The reception performance may be affected under a strong interference disturbance environment.

This product would not perform normally under a strong electrostatic environment.

The instructions must be kept since it contains important information.

We wish you many happy hours of pleasure with your toy.

TROUBLESHOOTING

Problem- Vehicle does not move or moves slowly.

- Has the rechargeable Battery been fully charged?
- Make certain the battery connectors are properly connected and the locking tab is fully latched.
- Make certain there are fresh alkaline batteries in the transmitter and that they have been installed in the correct position.
- Are the (+) and (–) markings on the alkaline batteries in the same position as the (+) and (–) markings in the Transmitter Battery Compartment?
- Make certain that the vehicle ON/OFF switch is in the "ON" position.

Problem - Vehicle moves by itself or exhibits reduced range from the transmitter.

- Make certain there is no outside radio interference in your area. The best way to test this is to take the vehicle as far away from radio towers, electrical lines or tall buildings as possible to ensure no further radio interference will occur.

FCC CAUTION:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
