Table PC

FCC ID: 2ASQ8AITUTWS18D

Model Name: AITUTWS18D14-01

About Android

An Android Tablet can perform many of the same functions as a computer. But you can also adjust it to better suit your needs, to receive the information you want, and have fun at the same time. You can add and delete applications, or enhance them to improve functionality.

Google, Android, Google Play and other marks are trademarks of Google LLC.

Applications

An application is a table program that helps you perform a task.

For example, take photos and download more applications.

Widget

A widget is small app lication on the Home screen that typically displays information such as Analog clock, Music and you can use directly on your Home screen. For example, the Music widget allows you to start playing audio files directly on Home screen . You can also add a widget such as Analog clock that shows time.

Application menu

enjoy applications from the Application menu

Application menu

The Application menu, which you open from your Home screen, contains the applications that come installed with your table.

The Application menu extends beyond the screen width, so you need to slide left and right to view all content.

Tablet status bar and notifications

The status bar at the top of the screen contains icons that tell you about messages and table status and shows what's going on in your table.

At the top you get notifications when there is something new or ongoing.
For example, new message.

signal strength, battery status and other information appear here.

Email

Find it: Application menu > Email

The Email application in your table offers you to compose, send and receive emails through your regular email account.

You need create account first, and then create email to send. You can configure Email for most accounts in just a few steps.

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
