### RADIATED EMISSION BELOW 30 MHz

**RADIATED EMISSION ABOVE 30 MHz**

**CONDUCTED EMISSIONS**

**PURPOSE:** Conducted emissions refers to the RF energy emitted by a device back to the public utility via the AC power cord. These emissions become radiated emissions (via the utility power lines) that interfere with radio reception.

**SITE REQUIREMENTS AND MEASUREMENT PROCEDURES:**  
 120 V, 50/60 Hz, and 1000W or less

**EXAMPLES OF PRODUCT STANDARDS CONTAINING EMISSIONS LIMITS:**  
 FCC PART 15 and PART 18  
 CANADA - ICES-003 and ICES-005  
 EUROPE - EN55022 and EN55024  
 JAPAN - VCCI Class A and B  
 MIL-STD-883C

**FREQUENCY TOLERANCE OVER EXTREME CONDITIONS**

**END OF REPORT**
