RE: your e-mail dated October 9, 2003; Airspan Networks Ltd.  
**FCC ID: PIDAIRSPAN-BSR, ATCB000794**

Dear Mr. Johnson,  
Please find below the answers to your questions.

- 1) A frequency hopping list sample was added to the product technical description. A revised file "WipLL-5.8\_technical\_description\_rev1" was uploaded on October 21, 2003.
- 2) A revised file "WipLL-5.8\_technical\_description\_rev1" includes a 1.33 Mbit/s rate for Hybrid mode.
- 3) Actually 62 channels are used in the device. A missed channel F62 was added to revised file "WipLL-5.8\_technical\_description\_rev1"; revised test report AIRRAD\_FCC.15529\_rev2 (pages 9, 11, 133) was uploaded on October 21, 2003.
- 4) According to the Airspan statement the product is intended for point-to-multipoint operations, hence, reduced limits were used throughout the testing.

Many thanks for your continuous help and patience.

Sincerely,

Marina Cherniavsky,  
certification engineer  
Hermon Laboratories
