

XC18A Operational Description:

The XC18A is a wireless color camera, which contains a 2.4 GHz FM transmitter. The transmitter operates on one of 4 user selectable channels, A, B, C & D. Their respective frequencies are 2414 MHz, 2431 MHz, 2450 MHz and 2468 MHz. The XC18A takes the camera Input signal and FM modulates the signal into a 2.4 GHz carrier. The signal is then transmitted via a patch antenna to the VR13A or VR36A 2.4 GHz receiver.
