

CEILING FAN REMOTE CONTROL MANUAL

ACTIVATING THE LEARNING PROCESS

1. After installation is complete, AC power is turned on within 30 seconds, press and hold the **LEARN** button for 3 seconds. The receiver will make sound, Bi, twice. The ceiling fan turns on 1 speed and the lights flash twice. This will indicate the receiver has learned the ID that was previously selected on the transmitter. Then the wall transmitter can control the receiver.

2. If user cannot finish the setting within the 30 seconds time frame, the main power must be turned off and re-started again. This will reset the unit. Repeat step 1 until the LEARNING feature is activated as indicated.

DIP SWITCH – 0 & 1

0: All handsets and receivers are factory pre-set to the same channel. You can operate the fan without doing a channel setting above but we recommend that you set an individual channel for your fan.

1: This is to allow for each handset and receiver to be set on an individual channel.

WALL TRANSMITTER OPERATION

Press button 1~6 to set fan speed

Press this button to turn the fan off.

Press this button to set fan wind direction up or down.

ON/OFF—Press this button and release instantly to turn on or off the light.

DIMMER—Press and hold to dim or brighten lights to the desired level and release.

Press and hold to the desired CCT and release.

TRANSMITTER

When pressing remote button every time, the LED indicator would be on.

: Pull out for turning off AC power

Installing Wall Control (TRANSMITTER):

Remove wall plate, disconnect and remove the toggle switch from wall junction box. Using the wire connectors, make the electrical connections to the wall control (transmitter) unit. Carefully push all connected wires inside wall switch box. Secure wall control unit with 2 screws previously removed. Face plate could be locked onto the transmitter.

To assure continued FCC compliance:

FEDERAL COMMUNICATIONS COMMISSION INTERFERENCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CAUTION:

To assure continued FCC compliance:

Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment.

FCC ID : 2AQZU-18049

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Warning

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
