RE: ZAGG, Inc.

FCC ID: QTG-ZKIS

IC: *not requested at this time*

ATCB018251

After a review of the submitted information, I have a few comments regarding the above referenced Application. Please note that, depending on your responses, there may be additional comments.

Q: The Operational Description references "ZAGG Inc. Bluetooth keyboards" – is this the only host into which the EUT will be installed? If not, what are other potential hosts? To whom will the EUT be marketed? Who will be installing the EUT? Will the end-user ever install it? Is installation controlled in some way by the applicant? Please clarify.

A: The operation description does reference multiple keyboards. This is not the only host that the EUT will be installed in. The other potential hosts are similar keyboards with slight variations in size and language keys to accommodate different tablets. All of the keyboards will be ZAGG Inc. products and under strict control to comply. The EUT will not be marketed separately to anyone and will only be sold when integrated into a final keyboard product to be marketed to end consumer customers. The EUT will only be installed by Contract Manufacturers under direct control of ZAGG Inc. The end user will never install it.
