

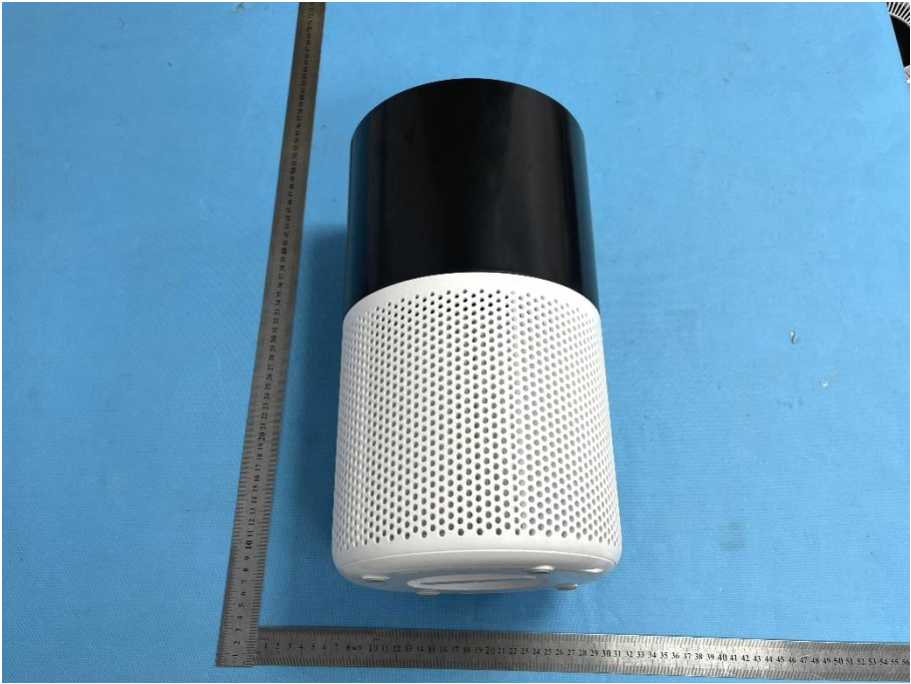

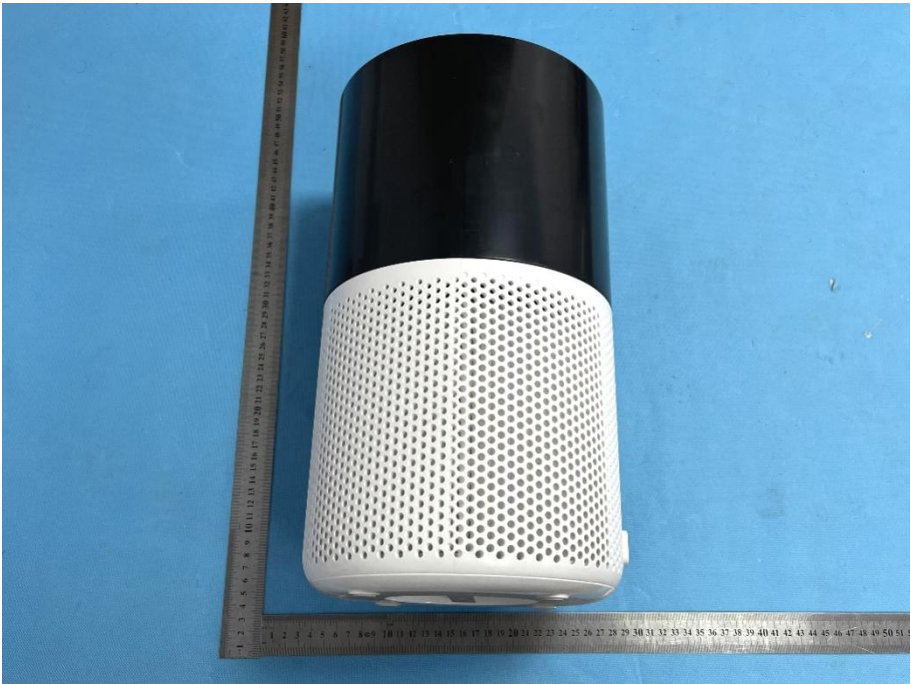

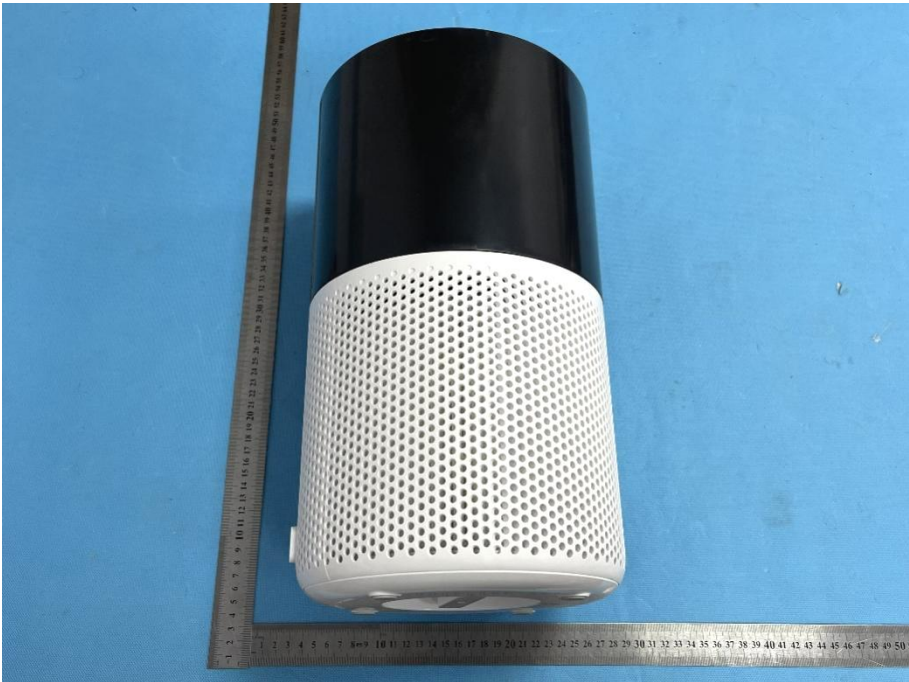

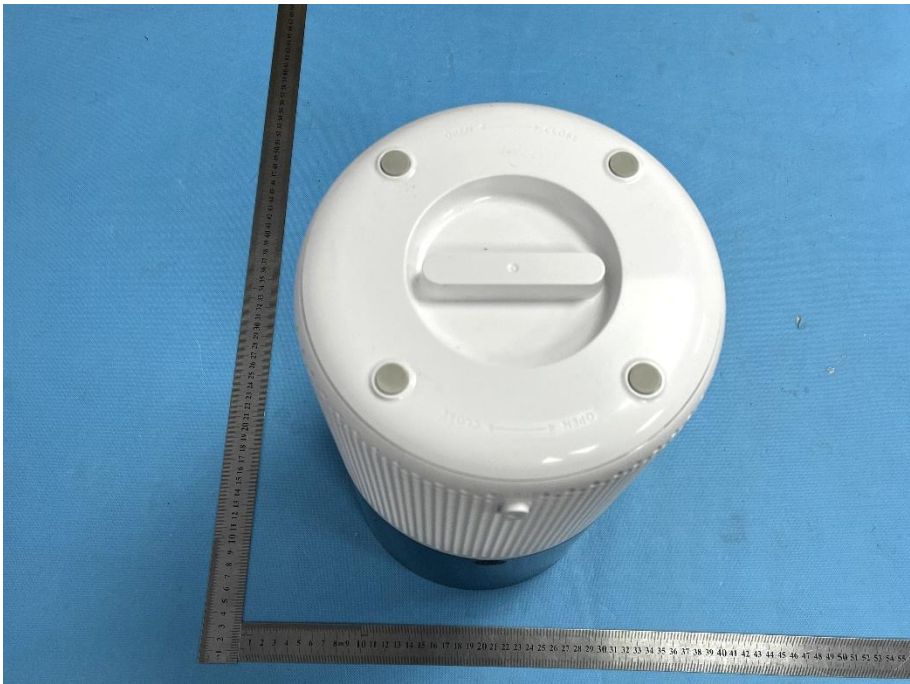

EXHIBIT 2 - EUT EXTERNAL PHOTOGRAPHS

EUT View 1	 A top-down photograph of a black and silver cylindrical Electronic Under Test (EUT) device. The device has a black top section with a circular control panel featuring several buttons and a power symbol. Below the control panel is a silver-colored base. A white power cord is plugged into the side of the device. A metal ruler is placed vertically to the left of the device for scale, and a blue surface is visible in the background.
EUT View 2	 A side-view photograph of the same EUT device. It shows the cylindrical shape and the transition from the black top to the silver base. The control panel is visible on the top surface. A metal ruler is placed vertically to the left of the device for scale, and a blue surface is visible in the background.

EUT View 3	 A photograph of a cylindrical electronic unit (EUT) against a blue background. The unit has a black upper section and a white lower section with a fine grid of small holes. A metal ruler is placed vertically to the left of the unit for scale, showing the unit's height is approximately 15 cm.
EUT View 4	 A photograph of the same cylindrical electronic unit from a slightly different perspective. It shows the black top and white perforated body. A metal ruler is placed vertically to the left, indicating a height of about 15 cm.

EUT View 5	 A photograph of a cylindrical electronic unit, likely a speaker or a small air purifier. The unit has a black upper section and a white lower section with a fine perforated mesh. It is placed on a blue surface next to a wooden ruler for scale. The ruler shows the unit is approximately 15 cm high.
EUT View 6	 A photograph of the same cylindrical electronic unit from a slightly different angle, showing the bottom and side. The unit is black and white with a perforated mesh. It is placed on a blue surface next to a wooden ruler for scale. The ruler shows the unit is approximately 15 cm high.

EUT View 3

EUT View 4	 A photograph of a white, cylindrical electronic unit (EUT) with a perforated lower section, placed on a dark surface next to a measuring tape. The unit is oriented vertically. The measuring tape is positioned horizontally below the unit, showing a scale from 0 to 100 cm. The unit's height is approximately 100 cm. The unit has a smooth upper section and a lower section with a fine, circular perforated pattern. A small label with the number '2' is visible on the upper section.
EUT View 5	 A photograph of the same white, cylindrical electronic unit (EUT) from a different angle, showing the perforated section more clearly. The unit is oriented vertically. The measuring tape is positioned horizontally below the unit, showing a scale from 0 to 100 cm. The unit's height is approximately 100 cm. The unit has a smooth upper section and a lower section with a fine, circular perforated pattern. A small label with the number '2' is visible on the upper section.
