QPRST31

QPRST31_Label

Operational Description Format & Location...

Hi Mike

Reply to Question #1: We have revised FCC ID Label.
(file name: QPRST31_Label Format & Location)

Reply to Question #2: We have revised FCC ID Label.
(file name: QPRST31_Label Format & Location)

Reply to Question #2: Yes, this transmitter can only be tuned to 88.1 to 107.9MHz by the end user.

We have revised operational description.
(file name: QPRST31 Operational Description)

Thank you very much for your assistance in this matter.

> Question #1: The proposed FCC ID label location is placed on the transmitter holder. The transmitter holder may be used by some other transmitter. Please revise your proposed FCC ID label location to be placed on the transmitter. Submit revised FCC ID label location.

>

> Question #2: The transmitting frequency range on the FCC ID label format does not agree with the frequency range investigated in the test report. Please make necessary correction.

>

> Question #3: Operating frequency range described in the operational description is from 88 -108MHz which does not agree with 88.1 - 107.9MHz fundamental frequencies range. Please make necessary correction. Please confirm that this transmitter can only be tuned to 88.1 to 107.9MHz by the end user.
