

Description of changes to Tsunami 480

There are no changes of RF circuitry in Tsunami 480 ODU unit.

For IDU unit, we had changed the following:

- IDU enclosure was changed from step box shape to rectangular shape housing. Please refer to the product photo.
- We used New Power Supply Module (27945). New module is improved for power efficiency, and better Conducted EMC filtering. Please refer to the re-submitted product schematics.
- We also improved grounding and shielding of modem/mux module (27960). As the improvements cannot be shown from the schematics, we have included additional pages giving notes and marks on the areas where the improvements are made.
