

Description of Changes

Changes are as below.

Item	Control (ME6000A_MAIN -> OTR_PF1_23)
Before	 The image shows the ME6000A_MAIN control board. It is a yellow PCB with various components including capacitors, resistors, and integrated circuits. A QR code is visible on the board, and the text 'ME6000A_MAIN' is printed. A warning label 'WARNING HIGH VOLT' is also present.
After	 The image shows the OTR_PF1_23 control board. It is a green PCB with various components including capacitors, resistors, and integrated circuits. A QR code is visible on the board, and the text 'OTR_PF1_23' is printed. A warning label 'WARNING HIGH VOLT' is also present.

Note

- There is change of control board
 - 1) Add wireless module by FCC certified
 - 2) New control board (Non-transmitter portion)
 - Overcurrent protection design (Fuse+add NCT)
 - Temperature protection design (add OTP circuit)
