

ExtremeWireless 802.11ax Wi-Fi 6E AP3000 Indoor Access Point

AP3000 Overview

The AP3000 access point is an indoor model 802.11ax Wi-Fi 6E access point. The AP3000 comes with internal antennas, built-in dual-band radios, two band-locked radios, four dual-band WiFi internal antennas, and one Bluetooth Low Energy (BLE) antenna.

The AP3000 can be mounted on a flat surface such as a wall, solid flat ceiling, to a junction box or a gang box, and can be installed on a suspended ceiling or a drop ceiling. The AP3000 access point has the following features:

- Radios:
 - Two 802.11ax radios (2X2 2.4GHz, 2X2 6 GHz radio, and 2X2 5 GHz radio)
 - One IoT Radio (2.4 GHz)
- Console port: Micro USB
- Two Ethernet ports (Eth0 and Eth1)
 - Eth0: 2500/1000/100 Mbps auto-negotiation Ethernet port, RJ45, Power over Ethernet (PoE) at 802.3at
 - Eth1: 1000/100/10 Mbps, RJ45
- One multicolor status light
- One reset button
- One Kensington lock
- One USB 2.0 type A connector
- Power: PoE 802.3af and 802.3at (see [Table 1](#) for details)
- Antennas: Four WiFi internal antennas and one BLE internal antenna
- Temperature: 0°C to +50°C (32°F to +122°F)
- Enclosure: Plastic

Table 1 AP3000 Power source

Power source	Description
Power over Ethernet (PoE)	Power is provided through the 2.5G Ethernet port of AP3000, compliant to be powered with 802.3at and 802.3at to provide full functionality. For reduced functionality, use 802.3af.
External 12V DC power supply (optional; ordering part #37215-PWR 12VDC/2A, 2.5mm x 5.5mm connector)	Power is provided through an external DC power supply plugged into an AC source.

Figure 1 Top view of AP3000

Figure 2 AP3000 access point hardware components

Table 2 Side ports on the AP3000 access point

Callout	Description
1	Console port
2	USB port
3	Reset button
4	Kensington security slot

Status LED Activity Description

The AP3000 access point has one status light on top of the chassis. The status light conveys operational states for system power, firmware updates, Ethernet and wireless interface activity, and major alarms.

- Steady white: The device has successfully established a Control And Provisioning of Wireless Access Points (CAPWAP) connection to ExtremeCloud IQ and is operating normally.
- Slow-blinking white: The device has a CAPWAP connection to ExtremeCloud IQ, but is operating on 802.3af power instead of 802.3at power.
- Steady amber: The device is initializing, rebooting, or is running without a CAPWAP connection.
- Slow-blinking amber: The device has no CAPWAP connection to ExtremeCloud IQ, and is operating on 802.3af power instead of 802.3at power.
- Fast-blinking amber: The device is upgrading its IQ Engine firmware.
- Dark: power is off.

AP3000 Box Contents

Ensure that the following items are available:

Table 3 Contents of the AP3000 Box

Quantity	Item
1	AP3000 access point
1	AP3000 Quick Reference
1	AH-ACC-BKT-AX-TB mounting bracket
2	Phillips pan head wood screws
2	Screw-in anchors

All optional brackets and accessories are sold separately. For detailed installation instructions about all mounting procedures, refer to the [ExtremeWireless Access Point AP3000 Installation Guide](#) in the [Extreme Networks Documentation Support](#) site.

Install the Access Point

Electrical Hazard: Only qualified personnel should perform installation procedures.

Use these instructions as guidelines for mounting and connecting the AP3000 access point easily and safely. The AP3000 comes with the AH-ACC-BKT-AX-TB mounting bracket that can be used to mount the access point on flat surfaces such as solid flat ceilings or wood walls.

Note: The mounting procedures for installing the access point to non-standard ceilings are covered in the [ExtremeWireless Access Point AP3000 Installation Guide](#).

Install the Access Point on a Wall or a Flat Ceiling

Use the AH-ACC-BKT-AX-TB mounting bracket for flat surface wall or solid ceiling installation.

Pre-installation checklist:

The following hardware is required for installing the AH-ACC-BKT-AX-TB accessory on a wall or a solid ceiling:

- An AP3000 access point
- One AH-ACC-BKT-AX-TB mounting bracket
- Two M3.5 pan head wood screws
- Two screw-in anchors

Note: The wood screws and screw-in anchors come in a separate plastic bag.

- 1 Using the AH-ACC-BKT-AX-TB mounting bracket as a template, mark and drill two mounting holes.
- 2 Attach the bracket to the wall using two M3.5 pan head wood screws. Use push-in anchors or screw-in anchors for drywall or plastic board installations on vertical walls.

Note: Screw-in anchors must be used for ceiling installations.

- 3 Attach the access point to the bracket by aligning the red dot on the bracket and the access point.
- 4 Press and rotate the access point 1/8 turn clockwise until it clicks into place on the accessory.

Note: For wall installation, the 'E' logo must be on the left side of the access point as shown in [Figure 1](#).

- 5 Attach the Cat5e RJ45 cable to the ETH0 port on the access point.

Install the Access Point on a Non-Standard Ceiling Grid or a Wall

For detailed non-standard ceiling grid installation or wall installation instructions, refer to the [Wi-Fi 6 802.11ax Access Points Accessories Guide](#).

The access point can be installed on a non-standard ceiling grid using the following accessories:

Table 4 Non-standard ceiling grid and wall accessories information

Bracket part number	Description
AH-ACC-BKT-AX-TB	Mounting bracket for Prelude ceilings (15/16 in. ceiling grid), Suprafine ceilings (9/16 in. ceiling grid), and walls. The ceiling tile sides must be flat
AH-ACC-BKT-AX-IL	Mounting bracket for Interlude (9/16 wide T-bar with protrusion) ceilings
AH-ACC-BKT-AX-SL	Mounting bracket for Silhouette ceilings (ceiling grid with 1/8 in. or 1/4 in. bottom opening)
ACC-BKT-AX-JB	Junction box or wall mounting for indoor access points
ACC-BKT-AX-BEAM	Beam mounting for indoor access points
ACC-BKT-AX-WL	Mounting bracket for direct-to-wall installations when a 1.25 inches of space is desired between the wall and the access point
AH-ACC-BKT-AX-WL	Mounting bracket for wall installation is the ACC-BKT-AX-JB bracket. Order the -JB bracket for new wall installations. The AH-ACC-BKT-AX-WL bracket is for users who already have the -WL brackets.

Lock the Access Point after Installation

Secure the access point by using the Kensington lock on the side of the access point. The security feature is used to prevent the access point from being removed from the mounting accessory.

Connect a Power Supply

If you need to power the AP3000 access point with an external 12V DC power supply, you can plug the power cord into the power connector on the back of the access point (see [Table 2](#) for security slot information).

There is no wall mount for the 12V DC power supply. The power LED on the front face of the access point is lit when the power supply is connected. For information about optional power supplies, refer to the [ExtremeWireless Access Point AP3000 Installation Guide](#).

Antenna Information

The access points have internal antennas.

- 2.2.4G/5G antennas
- 2.6G antennas
- 1.24G BLE antenna

Professional Installation Instruction

Installation personnel

This product is designed for specific application and needs to be installed by a qualified personnel who has RF and related rule knowledge. The general user shall not attempt to install or change the setting.

Installation procedure

Refer to the [ExtremeWireless Access Point AP3000 Installation Guide](#).

Warning: Select the installation position and ensure that the final output power does not exceed the limit set forth in relevant rules. The violation of the rule could lead to serious federal penalty.

Instructions d'installation professionnelle

Installation

Ce produit est destiné à un usage spécifique et doit être installé par un personnel qualifié maîtrisant les radiofréquences et les règles s'y rapportant. L'installation et les réglages ne doivent pas être modifiés par l'utilisateur final.

Procédure d'installation

Consulter le manuel d'utilisation [ExtremeWireless Access Point AP3000 Installation Guide](#).

Warning: Avertissement: Choisir avec soin la position d'installation et s'assurer que la puissance de sortie ne dépasse pas les limites en vigueur. La violation de cette règle peut conduire à de sérieuses penalties fédérales.

GE and Console Connections

The AP3000 has two GE (Ethernet) ports and a Console port. During administration and maintenance through the Console, the access point must still have a power connection through either an Ethernet PoE cable or an external DC power supply.

Regulatory and Compliance Information

Safety Guidelines

This section contains notices that are intended to protect your personal safety and to prevent damage to the equipment.

Qualified Personnel:

Electrical Hazard: Only qualified personnel should perform installation procedures. Within the context of the safety notes in this documentation, qualified persons are defined as persons who are authorized to commission, ground and label devices, systems, and circuits in accordance with established safety practices and standards. A qualified person understands the requirements and risks involved with installing outdoor electrical equipment in accordance with national codes.

Federal Communications Commission (FCC) Notice

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Operation in the band 5925-7125 MHz subject to, (1) FCC regulations restrict the operation of this device to indoor use only, (2) the operation of this device is prohibited on oil platforms, cars, trains, boats, and aircraft, except that operation of this device is permitted in large aircraft while flying above 10,000 feet, and (3) operation of transmitters in the 5.925 GHz - 7.125 GHz band is prohibited for control of or communications with unmanned aircraft systems.

Warning: FCC Radiation Exposure Statement: This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance of 47 cm between the radiator and your body.

Conformité Européenne (CE) Information

Warning: CE co-location MPE Statement: This equipment complies with CE radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance of 20 cm between the radiator and your body.

The device is restricted to indoor use only when operating in the 5150 to 5350 MHz frequency range.

CE Marking and European Area (EEA)

Warning: This is a Class B product. In a domestic environment, this product may cause radio interference in which case the user may be required to take adequate measures.

Other Countries

Brazil

Este produto está homologado pela ANATEL, de acordo com os procedimentos regulamentados pela Resolução nº. 242/2000 e atende aos requisitos técnicos aplicados. Este equipamento não tem direito à proteção contra interferência prejudicial e não pode causar interferência em sistemas devidamente autorizados. Para maiores informações, consulte o site da ANATEL - www.anatel.gov.br

Mexico Compliance Statement

La operación de este equipo esta sujeta a las siguientes dos condiciones:
1 Es posible que este equipo o dispositivo no cause interferencia perjudicial y
2 Este equipo o dispositivo debe aceptar cualquier interferencia, incluyendo la que pueda causar su operación no deseada.
The operation of this equipment is subject to the following two conditions:
1 It is possible that this equipment or device does not cause disruptive interference and
2 This equipment or device must accept any interference, including interference that may cause undesired operation.

UK Statement and CE Statement

This equipment complies with the UK and EEA radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance of 20 cm between the radiator and your body.
The frequency and the maximum transmitted power in the UK and European Conformity are listed below:

CE	UK
2400-2483.5 MHz: 19.98 dBm	2400-2483.5 MHz: 19.98 dBm
2400-2483.5 MHz (802.15.4): 8.03 dBm	2400-2483.5 MHz (802.15.4): 8.03 dBm
2400-2483.5 MHz (BLE): 8.0 dBm	2400-2483.5 MHz (BLE): 8.0 dBm
5150-5725 MHz: 29.96 dBm	5150-5725 MHz: 29.96 dBm
5725-5850 MHz: 13.97 dBm	5720-5850 MHz: 29.97 dBm
5945-6425 MHz: 22.99 dBm	5945-6425 MHz: 22.99 dBm

CE - The device is restricted to indoor use only when operating in the 5945 to 6425 MHz frequency range.

UK - The device is restricted to indoor use only when operating in the 5945 to 6425 MHz frequency range.

Hereby, Extreme Networks declares that the radio equipment AP3000-WW is in compliance with Radio Equipment Regulations 2017. Operation on oil platforms, cars, trains, boats, and aircraft shall be prohibited except for on large aircraft flying above 10,000 ft.

For full text of the UK Declaration of Conformity, please contact Extreme Regulatory Compliance at compliancerequest@extremenetworks.com.

Industry Canada Notice

This device contains license-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's license-exempt RSS(s). Operation in the band 5925 to 7125 MHz subject to the following two conditions: (1) IC regulations restrict the operation of this device to indoor use only, and (2) the operation of this device is prohibited on

oil platforms, cars, trains, boats, and aircraft, except that operation of this device is permitted in large aircraft while flying above 10,000 feet.

Cet appareil contient un ou des émetteurs/récepteurs exempts de licence conformes aux RSS exempts de licence d'Innovation, Sciences et Développement économique Canada.

Fonctionnement dans la bande 5925 à 7125 MHz sous réserve des deux conditions suivantes: (1) Les réglementations de la IC limitent le fonctionnement de cet appareil à une utilisation en intérieur uniquement, et (2) le fonctionnement de cet appareil est interdit sur les plates-formes pétrolières, les voitures, les trains, les bateaux et les avions, sauf que le fonctionnement de cet appareil est autorisé dans de grandes avion en vol au-dessus de 10 000 pieds.

Caution: The device for operation in the band 5150-5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

Caution: Avertissement: les dispositifs fonctionnant dans la bande 5150-5250 MHz sont réservés uniquement pour une utilisation à l'intérieur afin de réduire les risques de brouillage préjudiciable aux systèmes de satellites mobiles utilisant les mêmes canaux.

RSS-247 (6.4)
Where applicable, antenna types, antenna models, and worst-case tilt angles necessary to remain compliant with the e.i.r.p. elevation mask requirement set forth in section 6.2.2.3 shall be clearly indicated.

This device contains license-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's license-exempt RSS(s). Operation is subject to the following two conditions:

- 1 This device may not cause interference.
- 2 This device must accept any interference, including interference that may cause undesired operation of the device.

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

- 1 L'appareil ne doit pas produire de brouillage;
- 2 L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Caution: This equipment complies with IC RSS-102 radiation exposure limits set forth for an uncontrolled environment. This equipment must be installed and operated with minimum distance 28 cm between the radiator and your body.

Caution: Avertissement: Cet équipement est conforme aux limites d'exposition aux rayonnements IC établies pour un environnement non contrôlé. Cet équipement doit être installé et utilisé avec un minimum de 28cm de distance entre la source de rayonnement et votre corps.

Taiwan Regulatory Statement

第十二條 一經型式認證合格之低功率射頻電機，非經許可、公司、商號或使用者均不得擅自更換半導體元件或擴大功率或變更原設計之特性及功能。
第十四條 一低功率射頻電機之使用得影響飛航安全及干擾合法通信，經發現有干擾現象時，應即停用，並改善至無干擾時方得繼續使用。前項合法通信，指依電信法規定作業之無線電通信。低功率射頻電機或忍受合法通信或工業、科學及醫用電波射頻電機設備之干擾。

在 5.25-5.35 GHz 頻率帶內操作之無線資訊傳輸設備，限於室內使用。

無線資訊傳輸設備的製造廠商應保證其符合性。如欲製造廠商使用手冊上所述正常操作。發射的信號應維持於操作範圍內。

Taiwan Maximum Permissible Exposure (MPE) Warning

電磁波曝露量 MPE 標準內 (MPE) 1mW/cm²，測量內品質內為 0.734 mW/cm²

Avoid impacting the operation of nearby radar systems. 須避免影響附近雷達系統之操作。

High-gain directional antennas can only be used in stationary point-to-point systems. 高增益指向性天線只得應用於固定點對點系統。

European Waste Electrical and Electronic Equipment (WEEE) Notice

In accordance with Directive 2012/19/EU of the European Parliament on waste electrical and electronic equipment (WEEE):

- 1 The symbol above indicates that separate collection of electrical and electronic equipment is required.
- 2 When this product has reached the end of its serviceable life, it cannot be disposed of as unsorted municipal waste. It must be collected and treated separately.
- 3 It has been determined by the European Parliament that there are potential negative effects on the environment and human health as a result of the presence of hazardous substances in electrical and electronic equipment.
- 4 It is the users' responsibility to utilize the available collection system to ensure WEEE is properly treated. For information about the available collection system, please contact Extreme Environmental Compliance at Green@extremenetworks.com.
