Letter of Attestation

Model: TH-D75A Scanning receiver (FCC ID: K44512000)

This letter attests to the fact that JVCKENWOOD scanning receiver model TH-D75A meets the requirements of the FCC Rules, 15.121(a). Compliance is achieved through the following method(s):

- (1). The Microprocessor employed has internal flash memory, however the programming information cannot be read out from the Microprocessor, therefore it has same means of protection as a masked Microprocessor .
- (2). The Microprocessor is not to accept programming, selection, scanning or direct entry of Cellular band frequencies.
- (3). Filtering precludes reception of mixer images or harmonics of Cellular band frequencies.
- (4). It is subminiature SMD assembly and inaccessible multiplayer PCB construction, any attempts to modify the equipment to receive transmissions from the Cellular Radiotelephone Service likely will render the receiver inoperable.

Sincerely,

---
