Your reference

**Ref: FCC ID: 2AJW5-SCM1**

Dear ladies and gentlemen,

In December 2022, the telematics device SCM1 received American FCC approval with FCC ID 2AJW5-SCM1 from the responsible FCC approval authority. Due to the difficulties in the supply of components and the emerging difficulties in the various markets of the automotive supply industry, the telematics device SCM1 did not go into serial production. This means that the telematics device SCM1 has not yet been delivered into the market for our customers.

The management of our company, Continental Automotive Technologies GmbH, has decided to stop further development of the telematics device SCM1. And Continental Automotive Technologies GmbH decide **not to take the product SCM 1 to market , not sold the product SCM 1 in the US or not sold in any other country labeled with that FCC ID.**

For this reason we would like to dismiss the FCC approval with FCC ID 2AJW5-SCM1 of the SCM1 telematics device to the FCC authority.

Best regards,

Dr. Marion Grüner
