

EXHIBIT 3 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment (likely a spectrum analyzer or power meter) sits on a wooden bench. A red cable runs from the equipment down to a power supply unit on the floor. The power supply unit is connected to a power outlet on the wall. To the right, another wooden bench is visible, with a small electronic device and a power strip on it.
Radiation Emission Test View (30MHz to 1GHz)	 A photograph showing a radiation emission test setup. The room is lined with white, square-shaped electromagnetic shielding tiles. In the center, a black table is supported by white blocks. In the foreground, there is a metal frame structure with several vertical rods, likely for mounting antennas or sensors.
