Thank you.

We appreciate the trust and confidence you have placed in Husky through the purchase of earmuffs. We strive to continually create quality products designed to enhance your home. Visit us online to see our full line of products available for your home improvement needs. Thank you for choosing Husky!

Safety Information

Use caution and good judgment when operating the Earmuffs. Failure to adhere to the safety warnings and guidelines in this manual could result in body injury or property damage. Save this manual for future reference.

WARNING: Read and follow all warnings and instructions in this manual to avoid personal injury or property damage.

1. Always unplug the USB cable from the power source when not in use.
2. DO NOT place the earmuffs in water. Keep all components dry and out of water at all times.
3. DO NOT use this product for other than its intended use.
4. DO NOT charge or operate in close proximity of combustible or flammable materials.
5. DO NOT charge battery in gastight enclosures.
6. DO NOT attempt to charge or operate the earmuffs if USB, battery, or any part of the earmuffs is damaged or corroded.
7. Only use charging devices that are provided with the earmuffs or its replacements.
8. DO NOT disassemble or tamper with the battery.
9. DO NOT dispose of the battery in fire as this may result in explosion.

Warranty

- ☐ This product is guaranteed to be free of defects in materials and workmanship for 3 years from the date of product is defective, call 1-888-43-HUSKY or visit www.huskytools.com.
- ☐ Guarantee does not include normal wear and tear, USB cable, or rechargeable battery.

Pre-Operation

PACKAGE CONTENTS

Part	Description	Quantity
A	25dB Electronic Hearing Protection Earmuffs with Bluetooth	1
B	Type-C USB Charging Cable with Type-A Adapter	1
C	Aux Cable	1

Specification

Product Information	Specifications
NRR	25 dB
Input	DC 5V 1A(Max)
Bluetooth version	5.4
Battery	2.775 Wh
Bluetooth work distance	10 m
Charging time	2.5 hours
Runtime	40 hours
Bluetooth pair name	Husky earmuffs

Operation

FITTING

WARNING: Read and follow all safety warnings and instructions in the user manual before operating the earmuffs.

IMPORTANT: Do not allow the battery to discharge completely. When battery indicator is red flashing, it indicates low battery. Turn OFF the earmuffs and recharge the battery as soon as possible.

- ☐ Place the ear cups over ears as instructed by "R" and "L".
- ☐ Adjust the headband by sliding the headband up and down.
- ☐ Multiple-Position earmuffs can be worn either over-the-head, behind-the-head or under-the-chin.

Operation (continued)

OPERATING THE BLUETOOTH

☐ Hold the and buttons at the same time for 3S to disconnect the current Bluetooth connection.

Operation (continued)

OPERATING THE REAL ACTIVE LISTENING(RAL)

The RAL is a stand-alone function. To ensure that the ambient noise can always be heard, the RAL function is equipped with a sound level limiter that cuts off the maximum output level at 82 dB. Below 82 dB, the volume can be adjusted. This enables quiet sounds to be slightly amplified.

- ☐ While RAL is on, the LED status light will flash green every 1 hour.
- ☐ RAL will shut off automatically in 4 hours if not used.
- ☐ Turn off the RAL when answer calls.

OPERATING THE LINE IN FUNCTION

CHARGING THE RECHARGEABLE BATTERY

Care and Maintance

- ☐ Always keep the battery fully charged when not in use. This will prolong the overall life of the battery.
- ☐ Do not subject the unit to excessive force, shock, dust, or extreme temperature.
- ☐ Do not tamper with the external and internal components of the unit.
- ☐ Clean your unit with a dry cloth. Solvent or detergent should never be used.
- ☐ Avoid leaving your unit in direct sunlight or in hot, humid, or dusty places.
- ☐ Keep your unit away from heating appliances and sources of electrical noise such as fluorescent lamps or motors.
- ☐ Only use a type-C USB cable to charge this product.
- ☐ Only use auxiliary cable to line with this product.

Troubleshooting

- ☐ If the earmuffs do not work, make sure the battery is well-charged.
- ☐ If the battery charging indicator does not turn on, make sure the cable is correctly connected.
- ☐ If the bluetooth can not connect, make sure the distance is within 10m and both bluetooth are activated, or line in function is not working now.

NOTE:

- ☐ This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
- ☐ This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- ☐ The device has been evaluated to meet general RF exposure requirement.
- ☐ The device can be used in portable exposure condition without restriction.

This earmuff was tested according to American Standard 40 CFR 211.206.

Frequency(HZ)	125	250	500	1000	2000	3150	4000	6300	8000
Mean attenuation(dB)	16.6	20.8	27.3	31.7	34.9	35.9	38.5	40.8	40.6
Standard deviation(dB)	1.9	1.7	2.1	2.4	1.8	3.0	2.8	3.2	2.7

The level of noise entering a person's ear, when hearing protector is worn as directed, is closely approximated by the difference between the A-Weighted environmental noise level and the NRR.

Example

1. The environmental noise level as measured at the ear is 92dBA,
2. The NRR is 25 dB.
3. The level of noise entering the ear is approximately equal to 67dB(A)

CAUTION: For noise environments dominated by frequencies below 500Hz the C-weighted environmental noise level should be used. Improper fit of this device will reduce its effectiveness in attenuating noise. Consult the enclosed instructions for proper fit. Although hearing protectors can be recommended for protection against the harmful effects of impulsive noise, the Noise Reduction Rating (NRR) is based on the attenuation of continuous noise and may not be an accurate indicator of the protection attainable against impulsive noise such as gunfire. Constant or repetitive exposure to impulsive noise may lead to serious injury, including temporary or permanent deafness. The Noise Reduction Rating (NRR) calculated from the attenuation data is 25 dB. Earmuffs must be fitted to attenuate noise effectively. Please refer to manufacturer's instruction.
