<div>Magnetic Wireless Charging Stand</div> <div>User Manual</div> <div></div>	<div>Connect to Power Adapter</div> <div></div> <div>① Plug the power adapter into the socket. ② Connect the Type-C power cable to the adapter. Note: The 20W wall charger needs to buy separately.</div>	<div>Correct Charging Mode</div> <div></div> <div>Open the stand from the buckle position① as indicated by the arrow. Adjust the charger stand to proper angle, and place the magnetic wireless charging phone on the charging pad. The magnetic wireless charging phone will attach to pad well automatically and support view angle adjustment.</div>	<div>Correct Charging Mode</div> <div></div> <div>Magnetic wireless charging phones could be charged when the charger stand folded, the phone will attached to the pad well automatically, which could adjust the view angle with your preference. Note: This product supports wireless charging to the wireless charging devices without magnet built-in.</div>	<div>Note</div> <div>1. Do not squeeze or collisions. 2. Do not disassemble or throw into fire or water, to avoid causing a short circuit leakage. 3. Do not use wireless charger in severely hot, humid or corrosive environments, to avoid circuit damage and occurs leakage phenomenon. 4. Do not place too close with magnetic stripe or chip card (ID card, bank cards, etc.) to avoid magnetic failure. 5. Please keep the distance at least 20cm between implantable medical devices (pacemakers, implantable cochlear, etc.) and the wireless chargers, to avoid potential interference with the medical device. 6. To take care of the children, to ensure that they won't play the wireless charger as a toy, to avoid unnecessary accidents. The involved images are sketch maps, the final product as per the material subjects. Includes: wireless charger, user manual.</div> <div>Specification</div> <div><div>Input: 5V=3A 9V=2.22A 12V=1.67A Output: 5W/7.5W/15W Frequency: 110-205KHz Dimensions: Φ60×10mm</div><div>Charging distance: ≤10mm Conversion: ≥72% NW: 70g</div></div>

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radiofrequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
