Your phone should be treated with care. The following

suggestions can help you extend the life of your mobile

environments. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.

5) Avoid placing the device in a low temperature environment. When the temperature rises, the phone will produce water vapor that may damage electronic circuits.

6) Avoid placing the phone in dusty, dirty places, otherwise parts may be damaged.

7) Avoid placing the phone near a lit cigarette, open flame or any heat source.

8) Do not drop, knock or shake the phone. Rough handling can damage internal circuit boards.

9) Do not paint the phone. The paint may block headphones, microphones or other removable parts, and cause them not to work.

10) Use a clean, soft, dry cloth to clean the camera, light sensor lenses. Prohibit the use of harmful chemicals and cleaning agents to clean the phone.

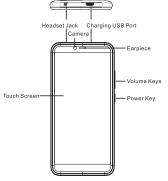

11)Pacemaker manufacturers recommend that a minimum separation of 5 mm be maintained between a mobile phone and a pacemaker to avoid potential interference with the pacemaker(when the device is used in the

USA the senaration distance can be maintained at 10mm between the user's body and the handset.). To achieve this use the phone on the opposite ear to your

12) Please consult your doctor and the device manufacturer to determine if operation of your phone may interfere with the operation of your medical

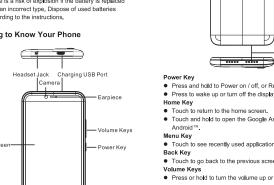

13) Turn off your mobile phone or wireless device when in a blasting area or in areas posted turn off "two-way radios" or "electronic devices" to avoid interfering with blasting operations

14) There is a risk of explosion if the battery is replaced with an incorrect type. Dispose of used batteries according to the instructions.

pacemaker and do not carry it in a breast pocket. Camera Flash

## Getting to Know Your Phone

Press and hold to Power on / off, or Restart the phone.

Press to wake up or turn off the display.

Touch to return to the home screen.

. Touch and hold to open the Google Assistant for

Touch to see recently used applications.

. Touch to go back to the previous screen.

Press or hold to turn the volume up or down.

### Installing a microSD Card (Not Included)

NOTE: Some applications may require a microSD card to work normally or may store certain data on it. Therefore, it is recommended that you keep a microSD card installed and not remove or replace it randomly.

## Basic Settings

Your service provider may default some device settings. so you may not be able to change these settings.

## Network and Internet

6

Connected devices

Swipe to the right to switch on Bluetooth. The phone will search automatically for nearby bluetooth devices.

## Display 🕼

## Brightness

Brightness level: Adjust the screen brightness.

## Lock display

Lock screen: Customize what to show on lock screen. Screen timeout: Adjust the time allowed before the screen goes to sleep after inactivity.

## Appearance

Dark theme: turn on/off the dark background. Font size: Set the font size of the system. Display size: Set the display size of the screen.

## Other display controls

Auto-rotate screen: Swipe to turn on or off. Screen saver: Choose the screen saver and when to start.

# Languages and input

# 1) You can set up all the languages supported by the

2)Keyboards: You can set On-screen keyboard and Physical keyboard.

## Date and time

## 1. Set time automatically: Swipe right to use date and time provided by network.

- 2. Time Zone: You can choose to use time zone provided by network or use location to set time zone.
- 3. Time format: You can choose to use local default time format or to use 24-hour format.

## SAR Information Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: smart phone (FCC ID: 2AQRM-A55 ) has also been tested against this SAR limit. The highest SAR value for this mobile phone tested is 0.988W/kg against the head and 0.446W/kg at 10 mm from the body.

## FCC Declaration of Conformity

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received. including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Use the smartphone in the environment with the temperature between -10°C and 45°C

Use the earphone carefully. Excessive sound pressure from earphones and headphones can cause hearing loss.

The product shall only be connected to a USB interface of version USB2.0

CAUTION: RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE, DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

Manufacturer: Foxx Development Inc..

## FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- -Reorient or relocate the receiving antenna.
- -Increase the separation between the equipment and receiver.
- -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- -Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This Smart phone meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: Smart phone (FCC ID:2AQRM-A55) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.988W/kg and when properly worn on the body is 0.446W/kg. This device was tested for typical body-worn operations with the back of the handset kept 10mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 10mm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
