NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules, which applies to residential areas. This equipment provides reasonable protection against harmful interference in residential installations. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used properly, it may cause interference to your radio communications. However, there is no guarantee that interference will not occur in a particular installation. If you experience interference to your radio or television reception, you can determine if the equipment is the cause by turning the equipment off and on, and the users encouraged to take the following steps to reduce the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into a different circuit or outlet from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by KIF could void the user's authority to operate this equipment. This equipment should be installed in accordance with the instructions is subject to the following two conditions:

- 1) This device may not cause harmful interference, and
- 2) This device must accept any interference received, including interference from licensed radio stations.

This device complies with FCC radiation exposure limits set forth for general population.

This transmitter is not to be co-located or operating in conjunction with any other antenna or transmitter.

Foldable

Model: iKF-T1
Bluetooth version: 5.3
Power input: DC 5V
Input parameters: 300mA
Charging interface: TYPE-C USB
Playtime : about 45-50 hours
Battery capacity: 400mAh
Charging time: about 2 hours
Supporting agreement: HSP/HFP/A2DP/AVRCP

Charging: White light is always on
Full power: White light off
Charging time: 2 hours

When charging the headset, to avoid damage to the battery, it is recommended to use a 5V/2A charging head to charge. The power of the charging head should not exceed 24W. Avoid using car charger/fast charging power bank or charging head with unknown power for charging, there may be situations where charging cannot be performed or the power consumption is too fast and the signal is poor.
