

D186 GEM Technical Description

The D186 GEM provides an audible and/or visual warning for the following conditions: backup (vehicle in reverse gear), brake (low brake fluid or parking brake on), door ajar, headlamps on, key-in-ignition, overspeed, seatbelt unbuckled, airbag fault, and low coolant level. Also, the GEM provides control over the following functions: battery saver, courtesy lighting, courtesy lighting extension, front windshield washer/ wiper, headlamps, panic alarm, perimeter alarm, power locks, illuminated entry, courtesy light arbitrator, chime arbitrator, autolocking, smart unlocking, keypad control, power locks arbitrator, decklid/hatch release, perimeter antitheft, alarm flash processing, driver configuration programming, keycode programming, automatic headlights, daytime running lights, headlamps arbitrator, heated backlight, one touch down (driver's window), power locking, and remote control. The remote control feature locks or unlocks the driver's door or all doors upon customer request using the remote keyfob's lock or unlock buttons, respectively. It also opens the decklid, unlocks the liftgate or activates the panic alarm upon pressing of the remote keyfob's decklid release button or the panic alarm button, respectively.
