

To Whom It May Concern:

The Cirronet BT2022M RF transceiver module has been tested and found to be compliant with the FCC module regulations and certified by the FCC (TCB).

The FCC Grant is available on the FCC Web site as: FCC ID: HSW-BT2022

The IC grant is available on the IC Web site as: IC: 4492A-BT2022

Basically, the BT2022M is a Bluetooth module and conforms to that specification.

Cirronet hereby confirms that the above referenced Bluetooth transmitter certified by the Federal Communications Commission and Industry Canada is the same version as supplied to Itronix Corporation for the IX260+ Rugged Laptop PC, unless otherwise notified, for FCC and IC certification purposes.
