

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT (Electronic Unit) housing. On the left, a green printed circuit board (PCB) is visible, featuring a yellow component and a small metal pin. To the right is a black plastic housing with a circular fan-like structure. Both components are placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler is oriented vertically, with the 0 mark at the top.
Solder Board-Component View 1	 A photograph showing a close-up of a solder board-component. A green PCB is visible, with a circular copper coil component soldered to it. The components are placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler is oriented vertically, with the 0 mark at the top.

Solder Board-Component View 2	 A photograph showing a green printed circuit board (PCB) component with a circular metal pad on its top surface. The component is placed on a blue textured surface next to a black L-shaped ruler for scale. The ruler has markings in millimeters (0 to 100) and centimeters (0 to 10). The circular metal pad is approximately 10mm in diameter.
Antenna View	Coil Antenna  A photograph showing the underside of the green PCB component, revealing a circular copper coil antenna. A red rectangular box highlights the coil, and a red line points from the text 'Coil Antenna' to it. The component is placed on a blue textured surface next to a black L-shaped ruler for scale. The ruler has markings in millimeters (0 to 100) and centimeters (0 to 10). The coil is approximately 10mm in diameter.
