

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

**EUT Housing and
Board View 1**

**EUT Housing and
Board View 2**

EUT Housing and Board View 3	 A photograph showing the internal circuit board of a circular electronic unit. The board is populated with various electronic components, including a central microcontroller, several integrated circuits, and surface-mount components. A black L-shaped ruler is placed next to the unit for scale, with markings in millimeters. The unit is resting on a blue textured surface.
EUT Housing and Board View 4	 A photograph showing the internal components of a circular electronic unit, specifically the coil and a brownish substance. The unit is open, revealing a copper-colored coil and a brownish substance. A black L-shaped ruler is placed next to the unit for scale, with markings in millimeters. The unit is resting on a blue textured surface.

Solder Board-Component View 1	 A photograph of a small, green, curved printed circuit board (PCB) component. The component is positioned horizontally against a black L-shaped ruler. The ruler has white markings in millimeters and centimeters. The component is located near the 10 mm mark on the horizontal ruler and the 10 mm mark on the vertical ruler. The component has several small, rectangular components soldered onto it, and a small, circular hole is visible near the bottom right corner.
Solder Board-Component View 2	 A photograph of the same green, curved PCB component from a different angle. The component is positioned horizontally against the same black L-shaped ruler. The component is located near the 10 mm mark on the horizontal ruler and the 10 mm mark on the vertical ruler. The component has several small, rectangular components soldered onto it, and a small, circular hole is visible near the bottom right corner.

Solder Board-Component View 3	 A circular electronic component, likely a microcontroller or sensor, is shown against a blue background. The component is dark with various soldered components and markings. It is positioned next to a black ruler with white markings, which shows dimensions in millimeters. The ruler is oriented vertically and horizontally, providing a scale for the component's size.
Solder Board-Component View 4	 The same circular electronic component is shown from a different perspective, revealing its underside. The component is dark and shows signs of wear or damage. It is positioned next to a black ruler with white markings, which shows dimensions in millimeters. The ruler is oriented vertically and horizontally, providing a scale for the component's size.
