B Battear CASTER - Auracast Audio Streamer www.bettear.com

Firmware Version: 1.0.2

Highlights:

- Low-Latency Audio Streaming (<40ms)
- Secure Streaming
- Audio Optimization (AGC, LPF, HPF)
- Intuitive Management Dashboard
- Power and Audio Cascading
- Full Support for Auracast™ Enabled Devices
- Extended Wide-Area Coverage

OVERVIEW

The B-CASTER is a powerful Auracast™ streamer designed to seamlessly sample and broadcast audio across various environments. It is ideal for both assistive listening and real-time Hi-Fi audio streaming.

The device is easy to install and integrate into different setups, ensuring a high-quality listening experience for all. Additionally, the B-CASTER also features a built-in, user-friendly web management panel for quick and simple configuration over an ethernet connection.

SAFETY PRECAUTIONS

HEARING SAFETY

This product is designed to amplify audio to a high-volume level which could potentially cause hearing damage if used improperly. To protect your hearing make sure the volume is turned down before putting on the headset, then adjust the volume up to the minimum setting required to hear clearly. Do not allow children or other unauthorized individuals to have access to this product without supervision.

*This device is equipped with Automatic Gain Control AGC to prevent the sensation of intense noise bursts.

MEDICAL DEVICE SAFETY

Before using the B-CASTER streamer with an implantable or other medical device, consult your physician or implant manufacturer or other medical device manufacturer. Always make sure you are using this product in accordance with the safety guidelines established by your physician or the implantable device manufacturer.

WARNING

- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
- Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate
 the equipment.
- Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.

- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
- Always observe standard safety precautions during installation, operation, and maintenance of this product. Only qualified and authorized service personnel should carry out adjustment, maintenance, or repairs to this product. No installation, adjustment, maintenance, or repairs should be performed by either the operator or the user.

Respectez toujours les standards de sécurité durant l'installation, l'opération et la maintenance de ce produit. Seul le personnel de service qualifié et autorisé devrait effectuer l'ajustage, la maintenance ou les réparations de ce produit. Aucune opération d'installation, d'ajustage, de maintenance ou de réparation ne devrait être effectuée par un opérateur ou l'utilisateur.

- This device contains license-exempt transmitter(s)/receiver(s) that comply with Innovation. Science and Economic Development Canada's license-exempt RSS(s). Operation is subject to the following two conditions:
 - (1) This device may not cause interference.
 - (2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le present appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radioexempts de licence. L'exploitation est autorisee aux deux conditions suivantes:(1) l'appareil ne doit pas produire de brouillage, et(2) l'utilisateur de l'appareil doit accepter tout brouillage radioelectrique subi, meme si lebrouillage est susceptible d'en compromettre le fonctionnement.

INTRODUCING THE B-CASTER

FRONT PANEL - INDICATION LED

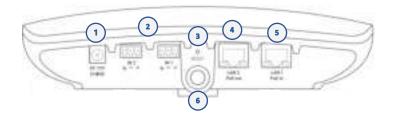

- 1. Power Indicator
- 2. Audio Broadcasting Indicator
- 3. LAN 1 Connectivity Indicator
- 4. LAN 2 Connectivity Indicator

Note: LAN 1 and LAN 2 indicators can also operate as audio presence indicators, switchable via the B-CASTER management panel.

REAR PANEL - CONNECTORS

- 1. Power Input 12VDC, 2.5A
- IN1 and IN 2: Balanced Analog Audio Inputs (Terminal Block Jack)
- 3. Reset Button
- 4. LAN 2 (PoE Out)
- 5. LAN 1 (PoE In)
- 6. Mounting Hole (3/8" Internal Thread)

QUICK START

- Connect to Audio Connect IN 1 and IN 2 to an audio source.
 For the best audio quality, it is highly recommended to use balanced audio inputs.
- 2. **Connect to Power** Use a 12VDC (⊙-**©**-⊕) power supply, or a Power Over Ethernet (PoE) source.
- Pair, Listen, Enjoy Use an Auracast™-compatible device to search and connect to the 'B-CASTER' stream.

Note: For advanced configurations, access the B-CASTER management panel.

Refer to the MANAGEMENT PANEL on page 5 for more details.

MANAGEMENT PANEL

The B-CASTER can be easily managed and optimized for best performance across various use cases.

Access the device's management panel to configure and control advanced settings, such as transmission power, broadcast name, security, audio quality, processing and more.

ACCESSING THE B-CASTER MANAGEMENT PANEL

Direct Connection to a Laptop

In **stand-alone mode**, you can seamlessly access the B-CASTER management panel by directly connecting your laptop to the B-CASTER.

Steps:

- 1. Connect an Ethernet cable from your laptop to the LAN 1 port of the B-CASTER.
- Configure your laptop's network settings:
 - a. Open 'Network Settings' and set the Ethernet adapter to static IP mode.
 - b. Assign the static IP: 192.0.2.10
 - c. Set subnet Mask to 255.255.255.0.
- 3. Open a web browser (Google Chrome, Safari, etc.,).
- 4. Enter the B-CASTER's default IP address in the address bar: 192.0.2.1, then press Enter.
- 5. You can now access the B-CASTER management panel.

Connection Over Network

The B-CASTER can be integrated into an existing third-party network.

To access the management panel in this setup:

- 1. Connect an Ethernet cable from the LAN 1 port of the B-CASTER to the local network switch.
- 2. Connect a laptop to the network via Wi-Fi or wired connection.
- 3. Use an IP Scanner to find the B-CASTER's IP address.
 - Optional scanners: Windows Advanced IP Scanner | macOS LanScan
- 4. Identify the B-CASTER by searching 'Bettear Accessibility Technologies Development' under the 'Manufacturer' / 'Vendor' section.
- 5. Open a web browser (Google Chrome, Safari, etc.,).
- 6. Enter the B-CASTER's IP address in the address bar and press Enter.
- 7. You can now access the B-CASTER management panel.

EXPLORING THE B-CASTER MANAGEMENT PANEL

Advanced features and settings can be accessed and configured through the B-CASTER management panel.

Summary Section

This section provides key information about the device, including:

- Device model
- Current firmware version
- Serial number
- Installed license
- MAC address
- Self-assigned local IP address

Broadcast Settings

This section allows to configure and control the audio broadcast settings.

Broadcast Mode Selection

Select the desired broadcast mode:

Stereo:

Streams IN 1 and IN 2 inputs as a single stereo channel.

Mix Mono:

Mixes IN 1 and IN 2 and streams them as a mono channel.

Note: Use the IN 1 and IN 2 gains and mute buttons in the Audio section to adjust the broadcast mix.

Compatibility Mode*:

When Compatibility Mode is enabled, the B-CASTER broadcasts, both 48KHz and 24KHz streams simultaneously, ensuring support for both high-quality audio and assistive listening modes.

Enabling/Disabling Broadcast

Toggle this switch to enable or disable the broadcast advertisement. Disabling the broadcast prevents users from accessing the stream.

Broadcast Name

Customize the broadcast name that will be advertised and displayed to listeners.

Encryption

Configure the broadcast as open or encrypted depending on the installation requirements.

If Encrypted Broadcast is enabled, enter a passkey (up to 16 digits) to access the stream.

Transmission Quality

Select the transmission quality that best suits the installation requirements.

Transmission Quality	ransmission Quality Details Hearing Aid Support	
Low quality	16KHz, 16-bit, 32kbps	Yes
Mid quality	24KHz, 16-bit, 48kbps	Yes
High quality	48KHz, 16-bit, 96kbps	No

Audio Settings

This section allows fine-tuning and adjusting of the input audio.

AGC (Automatic Gain Control)

Enable or disable AGC functionality.

Link Channels

Enable or disable **Link Channels** to adjust the **IN 1** and **IN 2** input gains simultaneously or independently.

Input Gains

Adjust **IN 1** and **IN 2** gain sliders to optimize the input signal level and balance the input levels when operating in **Mix Mono** mode. Mute or unmute each input as needed.

HPF

Audio Processing

Apply low-pass and high-pass filters to optimize the audio.

Transmission Power

Adjust the transmission Power using the **TX Power** slider.

Note: the maximum transmission power may vary depending on regional regulations.

Network Configuration

This section allows configuring the device's self-assigned IP and network settings.

DHCP Mode

When enabled, the device operates as a client, automatically obtaining an IP address from a DHCP server on the same network, which manage IP assignment.

If no DHCP server is detected, the B-CASTER defaults to its predefined IP configuration, allowing access in **stand-alone** mode.

Default IP address (if no DHCP server is available):

IP Address	Subnet Mask	Gateway
192.0.2.1	255.255.255.0	0.0.0.0

Static IP Mode

Select **Static IP** mode to manually configure the device's IP and network settings.

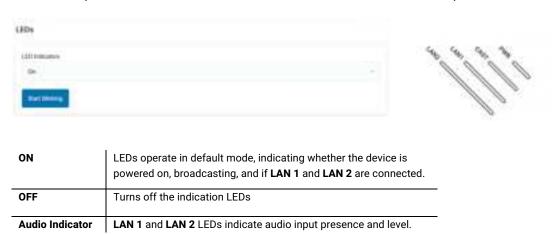

This mode is useful when managing multiple B-CASTER devices on the same network, as each device must have a unique IP address within the same network range.

Additionally, **Static IP** mode ensures that the device retains a fixed (static) IP address, preventing it from receiving a dynamically assigned IP from the DHCP server.

Note: After modifying the IP configuration and pressing 'Save Changes', you must reconnect to the management panel using the updated IP address.

LED Indicators

Select the operation mode of the indication LEDs on the B-CASTER's front panel.

Press 'Start Blinking' to flash all LEDs simultaneously.

This is useful for identifying the device when multiple units are in use.

Save Changes

After modifying the device settings, click 'Save Changes' to apply the changes or 'Reset' to discard them.

CONNECTION TOPOLOGY

B-CASTER devices support various installation configurations:

Diagram A - Basic installation (Stand-Alone Mode):

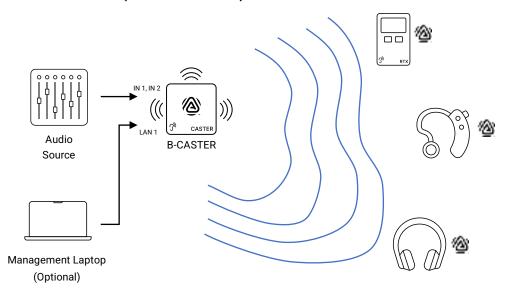

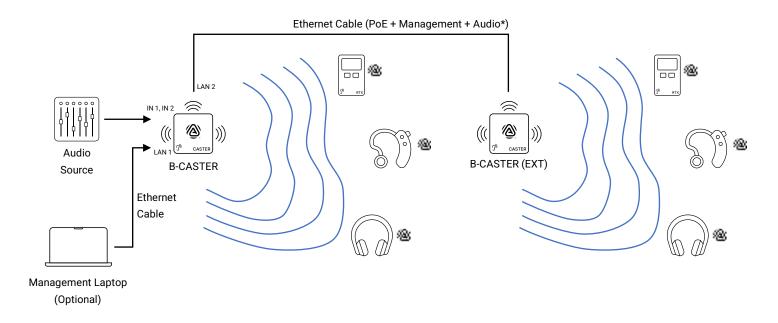

Diagram B - Expanded coverage installation:

Note: Audio expansion over Ethernet will be supported in a future B-CASTER firmware update.

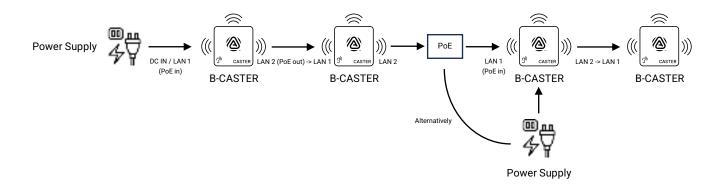

CASCADING

The B-CASTER features two built-in LAN ports enabling the cascading of multiple devices with power, control and audio over a single Ethernet cable*.

POE CASCADING

A B-CASTER device powered by either a 12V power supply or a PoE (Power over Ethernet) source can power an additional unit via an Ethernet cable. To link more than two units, a power supply or a PoE injector must be connected to the third unit.

Note: A power source connected to **DC in** takes priority over a PoE source connected to **LAN 1 (PoE in)**. If both power sources are connected, the device will use **DC in**.

CONTROL AND AUDIO CASCADING

The B-CASTER built-in network switch allows up to four devices to be linked via Ethernet for control and audio* transmission.

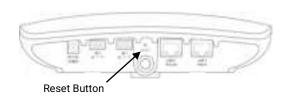

For larger setups, additional devices can be connected using an external network switch.

Note: Audio expansion over Ethernet will be supported in a future B-CASTER firmware update.

FACTORY RESET

To restore the B-CASTER device to factory settings:

Press and hold the **Reset** button for five seconds using a pin, until the LED indicators on the front panel start blinking.

SPECIFICATIONS

Audio l	Input
---------	-------

Input Modes	Stereo / Mono / Mix	
Maximum Input Voltage	2.1Vrms (4.2Vrms for balanced input)	
ADC Signal-to-Noise Ratio	110dB	
DAC Signal-to-Noise ratio	112dB	
ADC THD+N	-90dB	
Frequency Response	10Hz-22kHz	
Input Gain	-12dB to 32dB	
Sample Rate	48kHz	
Connection	2 x 3-pin 3.5mm pitch terminal block	

Audio Processing

HPF	Off, 80Hz, 120Hz, 250Hz
LPF	Off, 8KHz, 12KHz, 16KHz
AGC	Support for Automatic Gain Control

Radio

Bluetooth Version	5.3	
Broadcast Frequency	2400 – 2482 MHz	
Codec	LC3	
Max TX Power (El RP)	B-CASTER: 6 dBm	
Controllable TX Power	Yes (via B-CASTER management panel)	
Secure Broadcast	Yes (4-16-character password, AES128)	

Network

IP Address	Static, Reserved
Dort Spood	LAN 1 - 1 Gbps
Port Speed	LAN 2 - 1 Gbps (Enabled on CASTER-S licensed devices only)
PoE	LAN 1 – PoE in
POE	LAN 2 - PoE out (Enabled on CASTER-S licensed devices only)

Environmental

Operating Temperature -12 °C (10.4 °F) to 40 °C (+104 °F)
