

OR14A Operational Description

The OR14A is a 433 MHz pulsed RF transmitter. The remote can control a variety of TVs, VCRs and can send RF mouse signals to a USB receiver, model CM22A. The internal MCU receive information from the keypad and convert the keystrokes into a pulse code. The pulse code is then sent to the 433 MHz RF transmitter and is used to pulse modulate the 433 MHz carrier.
