

Retrofit Alarm Kit

Model: 4AW1SZ-0EN0

Complete instructions for setting up and installing the Ring Retrofit Alarm Kit can be found at:
ring.com/retrofit

Do not attempt to install this device without first reading the instructions on ring.com/retrofit.

We want you to successfully install this device. To do this, you'll need to complete a thorough pre-install inspection and test your existing wired alarm panel before you can begin the in-app setup and wiring process. All of this is outlined at ring.com/retrofit.

If you skip any of the steps listed on ring.com/retrofit, you may not be able to get the Ring Retrofit Alarm Kit to work.

Please visit ring.com/retrofit now.

This manual is for informational purposes only.

Working with electricity can be dangerous unless proper safety precautions are taken. If you are not comfortable or are inexperienced with the processes and tools described in these instructions, we recommend that you hire a licensed electrician. You are responsible for ensuring that you do not have any existing contractual obligations regarding your existing alarm system. You are also responsible for any changes or damage to your existing alarm system.

Before you begin, consider the following questions:

1. Are you comfortable with wiring projects?
2. Can you read, understand and use basic wiring diagrams?

3. Do you know how to use a multimeter to test wiring connections?

If you answered “No” to any of these questions, please consider hiring a licensed electrician or professional alarm installer to handle installing the Ring Retrofit Alarm kit for you.
