

FREQUENCY RANGE 30 MHz - 1 GHz

This plot is valid for Low, Middle and High Channels and all modulations.

FREQUENCY RANGE 1 - 3 GHz

GFSK modulation (DH5)

- Low Channel:

The peak above the limit is the carrier frequency.

- Middle Channel:

The peak above the limit is the carrier frequency.

- High Channel:

The peak above the limit is the carrier frequency.

• **PI/4-DQPSK modulation (2DH5)**

- Low Channel:

The peak above the limit is the carrier frequency.

- Middle Channel:

The peak above the limit is the carrier frequency.

- High Channel:

The peak above the limit is the carrier frequency.

- 8-DPSK modulation (3DH5)

- Low Channel:

The peak above the limit is the carrier frequency.

- Middle Channel:

The peak above the limit is the carrier frequency.

- High Channel:

The peak above the limit is the carrier frequency.

FREQUENCY RANGE 3 - 17 GHz

GFSK modulation (DH5)

- Low Channel:

- Middle Channel:

- High Channel:

• Pi/4-DQPSK modulation (2DH5)

- Low Channel:

- Middle Channel:

- High Channel:
