

SECTION 3**OCCUPIED BANDWIDTH**

Per 2.989 (c, 1) the measurements were made per TIA/EIA 603.

455.625 Mhz 12.5KHz

SECTION 3 D3, D4 (50 & 150 kHz spans) Page 3 & 4

SECTION 3**OCCUPIED BANDWIDTH**

Method of Measurement Per 2.989 (c,1) Data on Occupied Bandwidth is presented in the form of a spectrum analyzer plot which illustrates the transmitter sidebands. A plot is taken of the carrier sideband modulated with a 2500 Hz tone at a level 16 dB greater than that required to produce 50 percent modulation. (The spectrum analyzer grid indicates the reference level of the carrier unmodulated in all exhibits.)

SECTION 3 D3 &D4
Data, Digital Voice

$$Bn = 2(B/2) + 2DK \text{ where}$$

$$\begin{aligned} B &= 9600 \text{ Hz} \\ D &= 1800 \text{ Hz} \\ K &= 1(\text{assumed}) \end{aligned}$$

$$Bn=13200$$

The above calculation using Carson's rule exceeds the 11.25 kHz limit for Authorized bandwidth , Per 90.209 . We have measured the Authorized Bandwidth at the 99% power level and found a bandwidth of 6 kHz, , this measurement may be found on the Section 3 D4 plot:

Ericsson Inc. is asking for an Emission designator of

$$Bn=6000$$

$$\begin{aligned} &6K0F1D, \\ &6K0F1E \end{aligned}$$

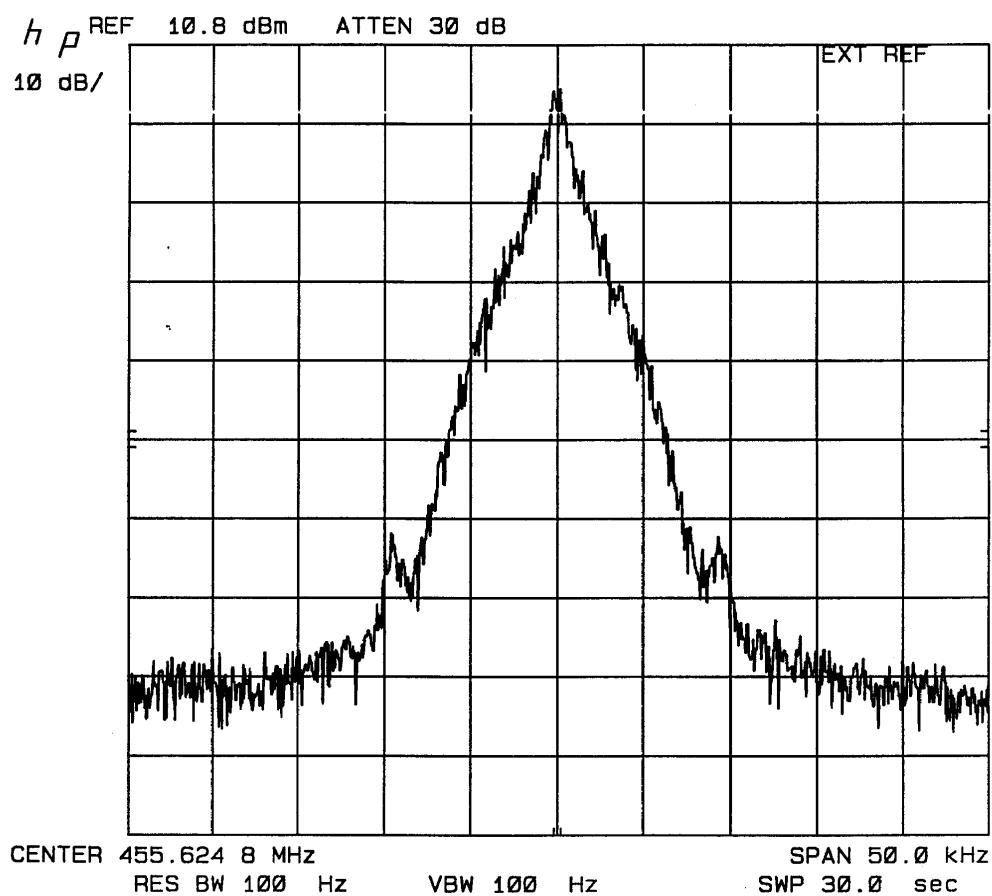

APPLICANT: Ericsson Inc.
