\*This Bluetooth connection method supports software configuration only, press and hold the FN + AI and turn the power switch to ON to turn on the controller, search for the named [ **BEITONG T9 BFM** ] to connect.

**IX FAQ**

**Q** Why the controller can not be connected to the receiver, Bluetooth devices?

**A** Generally, the receiver signal interference, or the controller is out of power.  
Solutions:

1. Make sure the controller has enough power, or charge it for 1 hour and try again to connect.

2. Try to insert the receiver into another USB port to test again, USB port to 3.0 is better.

3. If the above methods are not effective, please contact the official customer service.

**Q** What charger should be used to charge the controller?

**A** Use the standard 5V volt 1-2A charger, or use the BEITONG Zeus 2 wireless charging dock.

**Q** How do I upgrade the firmware of the controller?

**A** Install BEITONG Gaming Hall on your phone / Gamepad Assistant on your computer and follow the in-software instructions to upgrade the firmware.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

- 1) this device may not cause harmful interference, and
- 2) this device must accept any interference received, including interference that may cause undesired operation.

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

#### Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.
