

Applicant:	Logitech Far East Ltd.
FCC ID:	JNZF00008
RF Exposure Requirements (FCC KDB 680106 D01 v03)	
Requirements	Statements
(a) Power transfer frequency is less than 1 MHz	Yes. Operating frequency is 127.795 kHz.
(b) Output power from each primary coil is less than or equal to 15 watts.	Yes. The maximum power is 10 watts.
(c) The transfer system includes only single primary and secondary coils. This includes charging systems that may have multiple primary coils and clients that are able to detect and allow coupling only between individual pairs of coils.	Yes. The system includes three primary coils and the device is designed to charge a single client device.
(d) Client device is placed directly in contact with the transmitter.	Yes. The client device is placed directly in contact with the transmitter. The device is a charging pad which the client device is placed (close coupling).
(e) Mobile exposure conditions only (portable exposure conditions are not covered by this exclusion).	Yes.
(f) The aggregate H-field strengths at 15 cm surrounding the device and 20 cm above the top surface from all simultaneous transmitting coils are demonstrated to be less than 50% of the MPE limit.	Yes. Please refer to RF exposure report.
