(Factory 2: Built-in LED power board)

A circular white frame, likely a component of a microscope or similar optical instrument, is shown against a blue background. The frame consists of an outer white ring and an inner transparent ring. The inner ring has a scale with markings from 1 to 30 on both sides. Four small black dots are visible on the outer white ring. A ruler is placed next to the frame for scale, showing measurements in centimeters and millimeters.
