Declaration

To Whom It May Concern:

The WA-2200, WA-2200-1, WA-2200-C & WA-2200-C-1 are shipped with default power settings of 13 dBm for 2.4 GHz and 18 dBm for 5 GHz. This is because if there are multiple AP's installed it can cause interference between the different AP's. The installer has the capability to change the power setting to the maximum transmit power as indicated in the test reports. Therefore, we, Control4 declare the default transmit power is lower than the maximum transmit power.

Any question regarding this declaration, please do not hesitate to contact us.

Sincerely,

A handwritten signature in blue ink that reads "Roger Midgley".
