

EXHIBIT 2

Statement of Certification

(Pursuant to FCC Part 2.907 and 2.908)

2.1 Statement of Certification

Transceiver type described herein (AZ489FT4910) is in compliance with all applicable parts of the FCC rules. This device is P25 Compliant as well which meets FCC Part 90.548 and RSS 119 Section 5.11 as declared in exhibit 12.

Each unit manufactured, imported, or marketed will conform to the samples tested herein, within the statistical variations that can be expected due to high volume production and test measurement error.

2.2 Attestation Statement (Equipment Class DSS – Bluetooth)

This device contains an embedded Bluetooth device that are compliant with the applicable FCC Part 15C regulations.

Part 15.247 (a)(1)

- The hopping sequence must be pseudo random.
- Each frequency must be used equally on the average by each transmitter
- The receivers input bandwidth is approximately equal to the transmit bandwidth
- The receiver hops in sequence with the transmitted signal

Part 15.247 (g)

- The system is designed to comply with all of the regulations in this section when the transmitter is presented with a continuous data (or information)

Part 15.247(h)

- The system does not coordinate its channel selection/hopping sequence with other frequency hopping systems for the express purpose of avoiding the simultaneous occupancy of individual hopping frequencies by multiple transmitters.
