FCC Digital Emissions Compliance

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the radio or television receiving antenna.
- Increase the separation between the computer equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the radio or television receiver is connected.
- Consult the dealer or an experienced radio television technician for help.

Canadian Digital Apparatus Compliance

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

Cet appareil numérique de la classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

WARNING: Per the FCC and Canada radio frequency (RF) exposure requirements,

- (1) Antennas must be supplied and installed as recommended by Intermec Technologies Corporation to insure compliance to RF exposure requirements. The antennas approved for use are Intermec part numbers 805-619-001 and 805-628-001. Correct antenna mounting is fully described within the Intermec IM5 Users Guide.
- (2) When installing and using Intermec approved remote antennas associated the RFID tag reader, a 23-cm (9.1-inch) passing distance must be maintained from any body part of the user or nearby persons and the remote antenna. The antenna must not be touched during transmitter operation.
- (3) Cables attached to the remote antennas must have a minimum length as provided from Intermec to insure the proper losses to control RF exposure.
- (4) RF safety requirements mandate this device cannot be co-located with other transmitters.

This radio is approved as a “module.” Therefore, the unit can be placed within any enclosure for use. As an approved module, the following restrictions apply:

1. The module must use the Intermec-approved antennas.
2. The unit must display “Contains TX FCC ID: EHA-xxxxxxx” with xxxxxx designating the FCC ID of the IM5 module, per the labeling requirements of Parts 2 and 15 of the FCC rules.
3. The power supply used with the module must be the Intermec unit tested with the module or the integrator must verify that their supply meets the FCC class B emissions limits when used with this module.
4. Integrators are responsible for insuring that the unintentional emissions of the resulting system meets the requirements of Part 15 of the FCC rules.

If any system integrator wishes to make changes, use their own antennas, or change the FCC ID, they will have to follow Parts 2 and 15 of the FCC rules for changes to a radio with module approval. Any changes to Intermec approved equipment will require proper notification to the FCC.
