Attention: Mr. Al Cirwithian

Reference: Class II Permissive Change Request for AMWUT896

Dear Al:

We recently filed for, and received a Grant of Equipment Authorization (Certification) for our GMRS/FRS Transmitter. The date of Grant is shown as June 24, 2003. This device was marked with an FCC Identifier: AMWUT896. However, I have been informed that the "Final Power FET" needs to be changed due to parts procurement difficulties at the production facility.

Therefore, we wish to make a Class II Permissive Change Request so that we can use a replacement device. The output power of the replacement will be the same as the original although there are some slight changes in component selection to permit the change.

We are providing new test data, a specification sheet of the new FET, a partial schematic showing the changes, and photos showing the placement of the new component.

Thank you for your consideration in this matter. Please contact me if you have questions.

Sincere regards,

A handwritten signature in black ink that reads "James R. Haynes". The signature is stylized, with a large, looped initial "J" and a cursive "Haynes".

James R. Haynes
Vice President, Engineering and Regulatory Affairs
