

## Description of Permissive Change

The application is prepared for FCC class II permissive change through software enabling to its original parent application. It's updated a different TX power limit table (full power) to apply SAR limit to identify SAR platform and straddle channel power has been changed to higher level to identify non-SAR platform

The device, original and updated versions, are electrically identical in all aspects except updated a different TX power limit table (full power) to apply SAR limit to identify SAR platform and straddle channel power has been changed to higher level to identify non-SAR platform
