About Watch

Getting started

Connecting the watch for the first time:

The first time you use the watch, just press 3H push button once.

The Watch offset second hand will start running, which indicates the watch has been activated.

Installing the Watch App

Connected

Please download the "Titan Connected" app from the Google Play Store or the Apple App Store.

Pairing a Watch with the App

Press 3H push button thrice in the Watch, the Watch BLE will turn ON for 30 seconds.

Then Open the App and follow the on-screen instructions.

Select "Octane1760" and then select the Watch variant. Then it will take you to pairing page.

Click on "Start Pairing" and the phone will begin searching for the watch.

NOTE: It is mandatory to keep the watch close to the phone during this process, as the Bluetooth range of this watch is 1 meter.

A Searching for your watch

B Finding your watch

Once the search is done, the App will display the watch.

Select the Watch and Click “Next”, which takes you to the calibration page.

Pairing Successful

Once the watch is successfully paired,
Tap "Next" to continue.

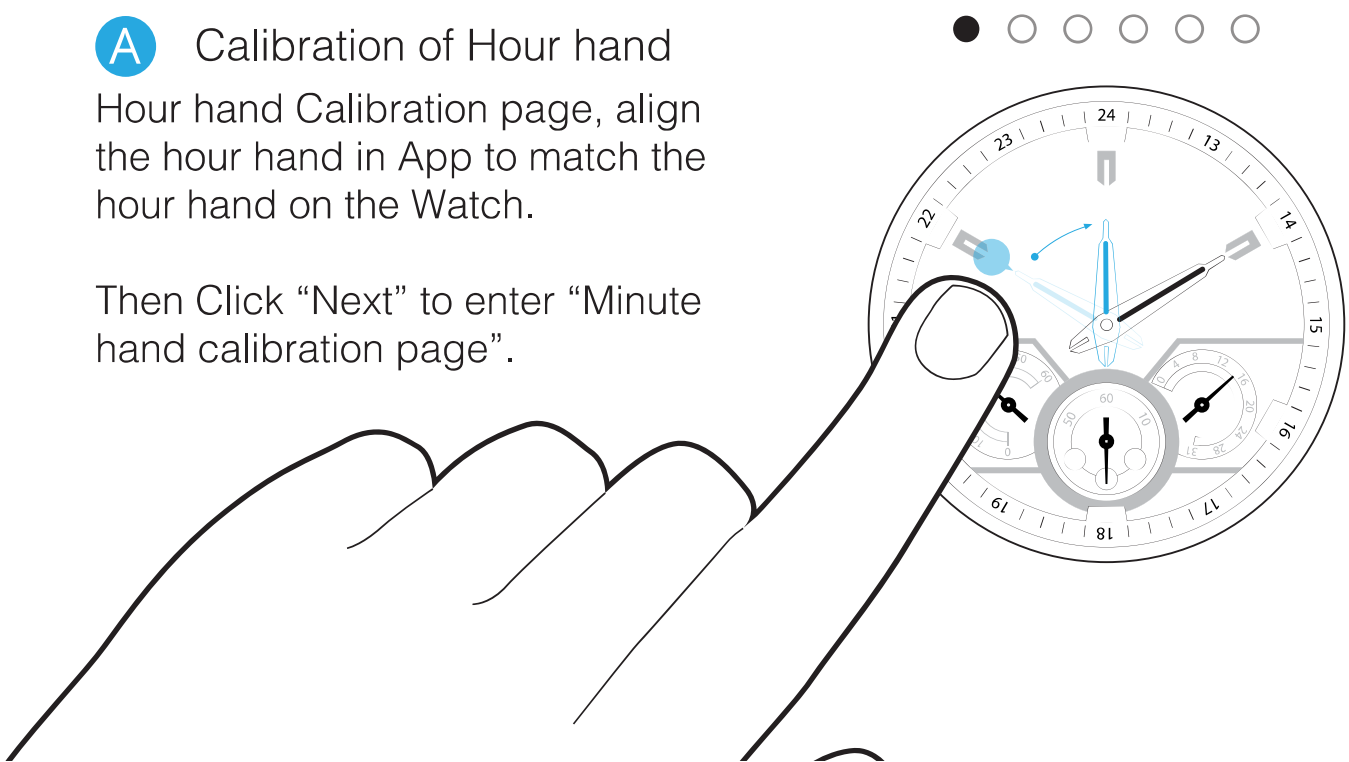

Calibration of Watch

As the watch doesn't have Crown to set the time, calibration is the only way to set the time for very first pairing.

A Calibration of Hour hand

Hour hand Calibration page, align the hour hand in App to match the hour hand on the Watch.

Then Click "Next" to enter "Minute hand calibration page".

Calibration of Watch

FCC Statement:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- 1) Reorient or relocate the receiving antenna.
- 2) Increase the separation between the equipment and receiver.
- 3) Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- 4) Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
