Dear Errol / Kwok:

Submitted herewith is an amendment in response to your e-mail dated April 7, 2000 requesting additional information for the subject application.

Hyundai Electronics Industries Co., Ltd. confirms that all production units will be tested for conducted power measurements before shipment to ensure that the maximum power does not exceed 27.8 dBm +0.2/-4 dB tolerance for AMPS mode, and 25.5 dBm +/- 0.3 dB tolerance for CDMA mode to comply with FCC RF exposure limits. Production units that do not meet this requirement will be readjusted. Attached is the revised tune-up procedure reflecting the above changes.

If you have any further questions regarding this matter, please do not hesitate to contact PCTEST Lab at (301) 596-2120.

Sincerely,

A handwritten signature in cursive script that reads 'Ki Soo, Kim'.
