

Class II Permissive Change description

This module is identical to the original Audio module except for following component changes

Item	TOP side of PCB
Before	 <p>The image shows the top side of a green PCB. A red rectangle highlights a component labeled 'ESMT' with part numbers 'MT512033-081', 'A2RM1', and 'P20H101'. Other components visible include IC10, IC12, IC13, and a large Mediatek ARM processor (MT8185A0V).</p>
After	 <p>The image shows the top side of the same green PCB after a component change. The red rectangle now highlights a component labeled 'NANJA' with part numbers 'NT500128MT6JH-006', '151104N1EF', and '3.1W'. The rest of the PCB, including IC10, IC12, IC13, and the Mediatek processor, remains identical to the 'Before' image.</p>

List of Change Items

Component	Before	After	Changed items		Block	Remark about Changed part
DDR3	M15T2G16128A-DEBG2R	NT5CC128M16JREK	DDR3 MEMORY	Changed		Same as before IC specifications but manufacturer is change.

Note

There is no changed about RF area. Only change DDR3 IC manufacturer.
