

Quick Start Guide

1 Charge your Tractive GPS tracker

Attach the tracker on the magnetic battery side to the charger provided. The LED on the tracker will turn red while the battery is charging.

Once the battery is fully charged, the red light will disappear. Pull slightly to remove the tracker from the charging cable. Before first-time use, please charge the tracker at least 2 hours.

2 Turn on the Tractive GPS tracker

The tracker is automatically turned on after charging. The power button on the side is used to turn the tracker on and off and to check its LED status.

ON/OFF: Press button for 3 seconds.
LED Status: Press button for 1 second.
LED blinks twice.*

- ● Network connected - no GPS
- ● No network - no GPS

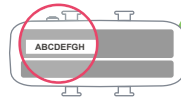

3 Download the Tractive GPS app

Download the Tractive GPS app from the Apple App Store or the Google Play Store. You can also visit my.tractive.com to track your pet.

4 Activate your Tractive GPS tracker

Follow the instructions in the Tractive GPS app or at my.tractive.com to activate your tracker. The 8-character Tracker ID can be found on the back of your tracker.

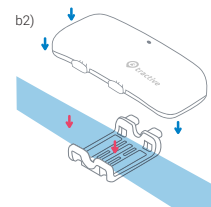

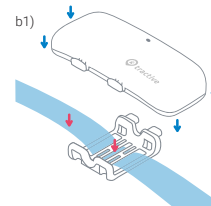

5 Attach your Tractive GPS tracker to your pet's collar

a) Remove your pet's collar and continue according to the collar width.

b1) **Collar width: 1.5 cm or less**
Remove the rubber clip, put the collar through the two rectangular holes on the sides of the rubber clip and fasten the rubber clip on the tracker again.

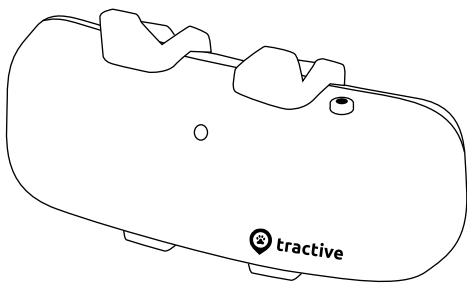

b2) **Collar width: 1.6 cm or more**
Open the rubber clip on one side of the tracker, place the collar in between the rubber clip and the tracker and close the rubber clip again.

c) Put the collar back on your pet and you are ready to go!

Happy Tracking!

Tractive GPS

ELECTROMAGNETIC COMPATIBILITY

Very strong magnetic fields (e.g. transformers) should always be avoided as this may result in variations in the transmission. Failure to follow these instructions may lead to malfunctions or damage to your Tractive GPS device.

RISKS FOR CHILDREN AND PEOPLE IN NEED OF CARE

The use of this device is not intended for people (including children) with limited physical, sensory or mental abilities or lack of experience and/or lack of knowledge, unless they are supervised by a person responsible for their safety or have been instructed on the use of the device.

Note: Some countries, states or regions have laws related to location based tracking of people, animals and objects. It's the sole responsibility of the owner and user to abide by the law and rules in the area the Tractive GPS device is used. Please switch off the Tractive GPS tracker before boarding a plane.

SAFETY ADVICE

Important: Although the Tractive GPS device is small in size, it might be too large or heavy for small or injured pets. If you are unsure whether you can use this device with your pet, we highly recommend consulting a pet doctor or veterinarian.

BATTERY OPERATION

Your Tractive GPS tracker is operated by a rechargeable lithium-ion polymer battery. The battery of the Tractive GPS tracker cannot be replaced and must not be removed. Batteries may not be disassembled, thrown into fire or short-circuited.

Never expose the Tractive GPS device to excessive heat such as sunshine, fire or the like! This increases the danger of battery leakage. Only use the USB cable that came with your Tractive GPS device. The use of other cables might overcharge the battery and can lead to fire or explosion. Disregarding these instructions can cause damage and possibly even cause the battery to explode.

DISPOSAL

Batteries are hazardous waste. For the correct disposal of batteries, appropriate containers are provided at the premises of commercial battery dealers as well as local council waste disposal facilities. If you want to dispose of your Tractive GPS device, follow the current local provisions at the time. Information may be obtained from the local council waste disposal facility.

FCC COMPLIANCE STATEMENT

The device complies with part 15 of the FCC Rules. The full statement of conformity can be viewed on our website: www.tractive.com/doc

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

This Product meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement the SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of this Device TRNJA4 (FCC ID: 2AVE6NJ44A) has been tested against this SAR limit. SAR information on this can be viewed on-line at <http://www.fcc.gov/oet/ea/fccid/>. Please use the device FCC ID number for search. This device was tested for typical operations 0mm from the body. To maintain compliance with FCC RF exposure requirements, 0mm separation distance should be maintained to the user's bodies

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC ID: 2AVE6NJ44A

Canadian regulatory statement

This device complies with Innovation, Science, and Economic Development Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:

(1) this device may not cause interference, and

(2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement. CAN ICES-3 (B)/NMB-3(B)

SAR Statement:

This Tractive GPS DOG LTE meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. IC RF Exposure Information and Statement the SAR limit of Canada (IC) is 1.6 W/kg averaged over one gram of tissue. Device types: TRNJA4 (IC: 25970-NJ44A) has also been tested against this SAR limit. This device was tested for typical body-worn operations with the back of the handset kept 0mm from the body. To maintain compliance with IC RF exposure requirements, use accessories that maintain a 10mm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with IC RF exposure requirements, and should be avoided.

Body-worn Operation This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 0mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
