1. Do not use the printer in any way other than described herein in order to avoid personal injury or property damage;
2. Do not place the printer near any heat source or flammable or explosive objects. We suggest placing it in a well-ventilated, cool and dustless environment;
3. Do not expose the printer to a violent vibration or any other unstable environment, as this may cause poor print quality;
4. Please use recommended filaments to avoid clogging of the extrusion head and causing damage to the machine;
5. Do not use the power cable of other products during installation. Always use a grounded three-prong power outlet, which accompanies the printer;
6. Do not touch the nozzle and the heated bed during operation to avoid burns or personal injury;
7. Do not wear gloves or wraps while operating the machine to prevent entrapment of movable parts that could cause crushing and cutting injuries to bodily parts;
8. Use the provided tools to clean the filament from the extruder in time taking advantage of the residual temperature after printing. Do not touch the extruder directly when cleaning, otherwise it may cause burns;
9. Clean the printer frequently. Clean the printer body with a dry cloth regularly after powering off the printer, wipe away dust, bonded print filament and foreign objects on the guide rails;
10. Children under 10 years old should not use the printer without supervision, otherwise it may cause personal injury;
11. Users should comply with the laws and regulations of the corresponding countries and regions where the equipment is located (used), abide by professional ethics, pay attention to safety obligations, and strictly prohibit the use of our products or equipment for any illegal purposes. Creality will not be responsible for any violators' legal liability under any circumstance;
12. Tip: Do not plug in or unplug wires on a charged basis.

3.Assembly Procedure

3.1 Material Rack Assembly Installation

- ① Install the material rack and material barrel according to the diagram;
- ② Align the installed material rack component holes with the locking positions to the immediate right of the gantry frame and secure them smoothly.

3.Assembly Procedure

3.2 Gantry Frame Assembly Installation

- ① Select the correct voltage mode based on the local power grid voltage.
- ② Place the gantry frame assembly into the slots on the base A. First, use four M4x11 screws to align and secure the left and right screw holes on the base B. Then, use four M4x11 screws to align and secure the screw holes on the bottom of the base.

- Please ensure the correct position for the power supply switch and make before supply connection, in order to avoid damage to the device.
- If the motor between 100V and 120V, please select the 115V for the power supply switch.
- If the motor between 200V and 240V, please select the 230V for the power supply switch (default is 230V).

3.Assembly Procedure

3.3 Touch screen installation

- ① Connect the touchscreen to the base screen using the flexible flat cable;
- ② Snap the buckle on the back of the touch screen into the slots on the base.

1 Start by inserting the nozzle cable into the cable clamp, then connect the nozzle kit, and finally use cable ties to secure the nozzle cable.

2 Connect the X&Z-axis motor (left).

3 Connect the X&Z-axis motor (right).
