Inquiry on 06/10/2024 :

Inquiry:

Hi:

Power Bank(portable wireless charging) FCC ID: 2A4MT-PB22

This product can be used as both mobile and portable devices. When the power bank is installed on the base, it will be a mobile device. If using the power bank alone, people using it can remove it from the base and carry it with them.

This is a portable device. If the user's phone runs out of battery and they are using it, they will need to hold the power bank in their hand to charge it. So it is necessary to choose the minimum distance that meets the regulations for RF exposure evaluation.

Portable wireless charging RF exposure evaluation test method confirmed.

FCC response on 06/20/2024

Dear Inquirer,

Based on the information provided in the test report related to the ECR, the design of the described WPT device is acceptable; further processing may proceed toward the equipment authorization.

Best regards,

OET Staff
