FCC ID: JQ66055BA

Differences between the Certified 6055B (6055-310) and 6055B (6055-320) HID MIFARE Readers

The antenna is the same size at the Certified 6055B (6055-310) HID MIFARE Reader (JQ66055BA) and the enclosure is identical. The schematics are identical.

Both the antenna board and main electronics board have been re-laid out; component and circuit trace positions have changed; the purpose is for improved manufacturability. Because of this, new carrier and spurious emissions measurements were taken and a new Test Report generated.

Class II Permissive Change

It is requested that the 6055B (6055-320) be granted Certification authorization under the above FCC ID Number.
