Qualcomm Technologies, Inc.

5775 Morehouse Drive, San Diego, CA

92121

Request for Modular Approval for  
FCC ID: J9CQCARD7280N2, J9CQCARD7280N, J9CQCARD7280P

| Item | Requirements                                                                                                                                                                                                        | EUT                                                                                                                                                                                                           |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.   | The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly                          | The module is equipped with its own shielding case.                                                                                                                                                           |
| 2.   | The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal                                                                  | The module has buffer modulation / data inputs.                                                                                                                                                               |
| 3.   | The module must contain power supply regulation on the module                                                                                                                                                       | The module has its own power supply regulation.                                                                                                                                                               |
| 4.   | The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per §§ 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b) | Not applicable to licensed modules.                                                                                                                                                                           |
| 5.   | The module must demonstrate compliance in a stand-alone configuration                                                                                                                                               | The module was tested on evaluation board, and it's not inside of another device during testing                                                                                                               |
| 6.   | The module must be labeled with its permanently affixed FCC ID label, or use an electronic display                                                                                                                  | The module transmitter will be labeled with its own FCC ID, and for OEM integration the integration manual contains labeling instructions for the host device per Part 15.212 (vi)                            |
| 7.   | The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee                                                  | The module approved transmitter complies with all applicable rules and the integration manual contains any specific requirements addressed to the integrator and/or to the end-user of the final end-product. |
| 8.   | The module must comply with RF exposure requirements                                                                                                                                                                | The modular transmitter complies with RF exposure requirement.                                                                                                                                                |

Sincerely,

John Forrester  
Sr. Director Engineering, EMC-Regulatory
