

ON (240)	The trigger light will turn on automatically when the sensor light is insufficient.
Light Sensor	It used to detect ambient light values using the sensor to decide how to adjust light and to detect automatic.
OFF	When sensor receives 12 level of low levels, automatic will control the your mobile phone not flip.
Flashy (240)	When sensor receives 12 level of low levels, automatic will control the your mobile phone not flip.

1. Insert the power cord into the wall using the spring to flip the lid.
2. Align the power cord into the slot using the lid (spring) for assistance.
3. Toggle the power OFF (0/1) to open the power port (OFF).
4. Plug a 250V three-phase power cord into the power port to connect to power outlet.

The image displays two side-by-side screenshots of a mobile application interface for 'tupé'. The left screen features a light gray background with diagonal stripes, the 'tupé' logo in a red box, and a large orange 'Sign Up' button. The right screen has a dark gray background and shows a notification 'New questions waiting for you!', a paragraph of text, and a 'Sign Up' button at the bottom.

Flat head  

Sharp head  

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
