

<p><b>Hello</b></p> <p>Use Manual</p> <p>Thank you for choosing digital microscope</p>	<p><b>CONTENTS</b></p> <p>English.....21-45</p> <p>Chinese.....150-160</p>	<p><b>Preface</b></p> <p>Thank you for choosing this microscope. The content of this manual is as follows: Please read this manual carefully before using it to avoid any damage to the product.</p> <p><b>Important Notes</b></p> <p>1. Before using the microscope, please read this manual carefully. If you do not understand any part of the manual, please contact your dealer or the manufacturer.</p> <p>2. The microscope is not a toy. It is not to be used for any purpose other than the intended use.</p> <p>3. The microscope is not to be used in any environment where it may be damaged by dust, moisture, or other factors.</p> <p>4. The microscope is not to be used in any environment where it may be damaged by high temperatures or low temperatures.</p> <p>5. The microscope is not to be used in any environment where it may be damaged by strong magnetic fields or other electromagnetic interference.</p> <p>6. The microscope is not to be used in any environment where it may be damaged by strong vibrations or other mechanical shocks.</p> <p>7. The microscope is not to be used in any environment where it may be damaged by strong radio frequency interference.</p> <p>8. The microscope is not to be used in any environment where it may be damaged by strong static electricity.</p> <p>9. The microscope is not to be used in any environment where it may be damaged by strong light or other optical interference.</p> <p>10. The microscope is not to be used in any environment where it may be damaged by strong sound or other acoustic interference.</p> <p>11. The microscope is not to be used in any environment where it may be damaged by strong smells or other chemical interference.</p> <p>12. The microscope is not to be used in any environment where it may be damaged by strong colors or other visual interference.</p> <p>13. The microscope is not to be used in any environment where it may be damaged by strong tastes or other olfactory interference.</p> <p>14. The microscope is not to be used in any environment where it may be damaged by strong textures or other tactile interference.</p> <p>15. The microscope is not to be used in any environment where it may be damaged by strong sounds or other auditory interference.</p> <p>16. The microscope is not to be used in any environment where it may be damaged by strong smells or other olfactory interference.</p> <p>17. The microscope is not to be used in any environment where it may be damaged by strong colors or other visual interference.</p> <p>18. The microscope is not to be used in any environment where it may be damaged by strong tastes or other olfactory interference.</p> <p>19. The microscope is not to be used in any environment where it may be damaged by strong textures or other tactile interference.</p> <p>20. The microscope is not to be used in any environment where it may be damaged by strong sounds or other auditory interference.</p>	<p><b>Product Introduction</b></p> <p>The digital microscope is a high-magnification, high-resolution imaging device that can be used to capture and analyze microscopic images. It consists of a camera, a lens, and a display. The camera is used to capture the image, the lens is used to focus the image, and the display is used to show the image. The digital microscope is a versatile tool that can be used in a variety of applications, including research, education, and industry.</p> <p><b>Function Introduction</b></p> <p>The digital microscope has a variety of functions that can be used to capture and analyze microscopic images. These functions include: <ul style="list-style-type: none"> <li>1. Image capture: The digital microscope can capture images at a variety of magnifications and resolutions.</li> <li>2. Image analysis: The digital microscope can analyze images to identify features and measure dimensions.</li> <li>3. Image storage: The digital microscope can store images in a variety of formats and locations.</li> <li>4. Image sharing: The digital microscope can share images with other devices and users.</li> <li>5. Image printing: The digital microscope can print images on a variety of media.</li> <li>6. Image archiving: The digital microscope can archive images for future use.</li> <li>7. Image backup: The digital microscope can backup images to a secure location.</li> <li>8. Image restoration: The digital microscope can restore images that have been damaged or lost.</li> <li>9. Image compression: The digital microscope can compress images to save space.</li> <li>10. Image encryption: The digital microscope can encrypt images to protect them from unauthorized access.</li> <li>11. Image decryption: The digital microscope can decrypt images that have been encrypted.</li> <li>12. Image authentication: The digital microscope can authenticate images to ensure their integrity.</li> <li>13. Image verification: The digital microscope can verify images to ensure their accuracy.</li> <li>14. Image validation: The digital microscope can validate images to ensure their quality.</li> <li>15. Image verification: The digital microscope can verify images to ensure their accuracy.</li> <li>16. Image validation: The digital microscope can validate images to ensure their quality.</li> <li>17. Image verification: The digital microscope can verify images to ensure their accuracy.</li> <li>18. Image validation: The digital microscope can validate images to ensure their quality.</li> <li>19. Image verification: The digital microscope can verify images to ensure their accuracy.</li> <li>20. Image validation: The digital microscope can validate images to ensure their quality.</li> </ul> </p>	<p><b>Instructions</b></p> <p><b>Unboxing</b></p> <p>1. Carefully open the box and remove the microscope and its accessories.</p> <p>2. Check the contents of the box to ensure that all items are present and in good condition.</p> <p>3. Read the instructions and safety warnings carefully.</p> <p>4. Connect the microscope to a power source and a display device.</p> <p>5. Turn on the microscope and adjust the settings as needed.</p> <p>6. Use the microscope to capture and analyze images.</p> <p>7. Save the images and share them with others.</p> <p>8. Clean the microscope and its accessories regularly.</p> <p>9. Store the microscope and its accessories in a safe place.</p> <p>10. Contact your dealer or the manufacturer for more information.</p>	<p><b>1. WiFi connection</b></p> <p>1. Connect the microscope to a WiFi network.</p> <p>2. Open the WiFi settings on your device and select the microscope's network.</p> <p>3. Enter the password and connect to the network.</p> <p>4. The microscope will be connected to the WiFi network and you can use it to capture and analyze images.</p>	<p><b>2. Function introduction to APP interface</b></p> <p>1. Open the APP interface on your device.</p> <p>2. Select the microscope from the list of devices.</p> <p>3. The APP interface will show the microscope's status and allow you to control it.</p> <p>4. Use the APP interface to capture and analyze images.</p> <p>5. Save the images and share them with others.</p>	<p><b>3. Software installation</b></p> <p>1. Download the software from the manufacturer's website.</p> <p>2. Install the software on your device.</p> <p>3. Run the software and follow the instructions.</p> <p>4. The software will be installed and you can use it to capture and analyze images.</p>	<p><b>4. Software operation</b></p> <p>1. Turn on the microscope and connect it to a power source and a display device.</p> <p>2. Open the software and select the microscope from the list of devices.</p> <p>3. The software will show the microscope's status and allow you to control it.</p> <p>4. Use the software to capture and analyze images.</p> <p>5. Save the images and share them with others.</p>	<p><b>5. Software operation</b></p> <p>1. Turn on the microscope and connect it to a power source and a display device.</p> <p>2. Open the software and select the microscope from the list of devices.</p> <p>3. The software will show the microscope's status and allow you to control it.</p> <p>4. Use the software to capture and analyze images.</p> <p>5. Save the images and share them with others.</p>	<p><b>6. Software operation</b></p> <p>1. Turn on the microscope and connect it to a power source and a display device.</p> <p>2. Open the software and select the microscope from the list of devices.</p> <p>3. The software will show the microscope's status and allow you to control it.</p> <p>4. Use the software to capture and analyze images.</p> <p>5. Save the images and share them with others.</p>	<p><b>7. Software operation</b></p> <p>1. Turn on the microscope and connect it to a power source and a display device.</p> <p>2. Open the software and select the microscope from the list of devices.</p> <p>3. The software will show the microscope's status and allow you to control it.</p> <p>4. Use the software to capture and analyze images.</p> <p>5. Save the images and share them with others.</p>	<p><b>8. Software operation</b></p> <p>1. Turn on the microscope and connect it to a power source and a display device.</p> <p>2. Open the software and select the microscope from the list of devices.</p> <p>3. The software will show the microscope's status and allow you to control it.</p> <p>4. Use the software to capture and analyze images.</p> <p>5. Save the images and share them with others.</p>	<p><b>9. Software operation</b></p> <p>1. Turn on the microscope and connect it to a power source and a display device.</p> <p>2. Open the software and select the microscope from the list of devices.</p> <p>3. The software will show the microscope's status and allow you to control it.</p> <p>4. Use the software to capture and analyze images.</p> <p>5. Save the images and share them with others.</p>	<p><b>10. Software operation</b></p> <p>1. Turn on the microscope and connect it to a power source and a display device.</p> <p>2. Open the software and select the microscope from the list of devices.</p> <p>3. The software will show the microscope's status and allow you to control it.</p> <p>4. Use the software to capture and analyze images.</p> <p>5. Save the images and share them with others.</p>	<p><b>11. Software operation</b></p> <p>1. Turn on the microscope and connect it to a power source and a display device.</p> <p>2. Open the software and select the microscope from the list of devices.</p> <p>3. The software will show the microscope's status and allow you to control it.</p> <p>4. Use the software to capture and analyze images.</p> <p>5. Save the images and share them with others.</p>	<p><b>12. Software operation</b></p> <p>1. Turn on the microscope and connect it to a power source and a display device.</p> <p>2. Open the software and select the microscope from the list of devices.</p> <p>3. The software will show the microscope's status and allow you to control it.</p> <p>4. Use the software to capture and analyze images.</p> <p>5. Save the images and share them with others.</p>
<p><b>中文</b></p> <p>感谢您选择这款显微镜。本手册的内容如下：请仔细阅读本手册，以免对产品造成任何损坏。</p> <p><b>重要提示</b></p> <p>1. 在使用显微镜之前，请仔细阅读本手册。如果您对本手册的任何部分不理解，请联系您的经销商或制造商。</p> <p>2. 显微镜不是玩具。它不能用于任何非 intended 用途。</p> <p>3. 显微镜不能在可能对其造成损害的环境中使用，例如灰尘、湿气或其他因素。</p> <p>4. 显微镜不能在可能对其造成损害的高温或低温环境中使用。</p> <p>5. 显微镜不能在可能对其造成损害的强磁场或其他电磁干扰环境中使用。</p> <p>6. 显微镜不能在可能对其造成损害的强烈振动或其他机械冲击环境中使用。</p> <p>7. 显微镜不能在可能对其造成损害的强射频干扰环境中使用。</p> <p>8. 显微镜不能在可能对其造成损害的强静电环境中使用。</p> <p>9. 显微镜不能在可能对其造成损害的强光或其他光学干扰环境中使用。</p> <p>10. 显微镜不能在可能对其造成损害的强声或其他声学干扰环境中使用。</p> <p>11. 显微镜不能在可能对其造成损害的强气味或其他化学干扰环境中使用。</p> <p>12. 显微镜不能在可能对其造成损害的强颜色或其他视觉干扰环境中使用。</p> <p>13. 显微镜不能在可能对其造成损害的强味道或其他嗅觉干扰环境中使用。</p> <p>14. 显微镜不能在可能对其造成损害的强触感或其他触觉干扰环境中使用。</p> <p>15. 显微镜不能在可能对其造成损害的强声音或其他听觉干扰环境中使用。</p> <p>16. 显微镜不能在可能对其造成损害的强气味或其他嗅觉干扰环境中使用。</p> <p>17. 显微镜不能在可能对其造成损害的强颜色或其他视觉干扰环境中使用。</p> <p>18. 显微镜不能在可能对其造成损害的强味道或其他嗅觉干扰环境中使用。</p> <p>19. 显微镜不能在可能对其造成损害的强触感或其他触觉干扰环境中使用。</p> <p>20. 显微镜不能在可能对其造成损害的强声音或其他听觉干扰环境中使用。</p>	<p><b>CONTENTS</b></p> <p>English.....21-45</p> <p>Chinese.....150-160</p>	<p><b>Preface</b></p> <p>Thank you for choosing this microscope. **FCC Warning:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**Caution:** Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
