

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the disassembled components of an Electronic Under Test (EUT) on a blue textured surface. The components include a black circular top cover, a black circular bottom cover, a black circular ring, and a green printed circuit board (PCB) with a copper coil and a black cable. A black ruler with white markings is placed horizontally and vertically for scale. The ruler markings are in millimeters (mm) and centimeters (cm).
Solder Board-Component View 1	 A photograph showing a close-up of the soldered board-component on a blue textured surface. The component is a green PCB with a copper coil and a black cable. A black ruler with white markings is placed horizontally and vertically for scale. The ruler markings are in millimeters (mm) and centimeters (cm).

Solder Board-Component View 2	
Solder Board-Component View 3	

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, likely a wireless charging antenna, resting on a blue textured surface. The board is populated with various electronic components, including integrated circuits, resistors, and capacitors. Two black wires are soldered to the board. The board has several labels, including 'E359347', 'TL-2', 'R02210001435', and 'RoHS'. The component is shown from a top-down perspective.
Antenna View	 A photograph showing the antenna component from a different perspective, highlighting the circular copper coil used for wireless charging. The coil is highlighted with a red rectangular box. A red line points from the text 'Wireless Charging Antenna' to the coil. A black ruler is placed next to the component for scale, showing measurements in millimeters. The component is connected to two black wires.
