

To: Equipment Autorisation Division

Federal Communications Commission

7435 Oakland Mills Road Columbia, MD 21046

From: Compal Electronics Inc

No.581 & 581-1, Ruiguang Rd., Neihu District, Taipei city, 11492 Taiwan

Regarding: Different is the memory SKU(16G) and model number but PCB layout not change for FCC ID: GKR436391

To Whom It May Concern,

We, Compal Electronics Inc, declare on our role responsibility for the product of model MP22- ARGON2X-C .

Model MP22- ARGON2X-C and MP22-ARGON2-C are share the same main-board circuit, while model

MP22- ARGON2X-C is new memory SKU (16G) and model number.

According to KDB 484596 D01, "different devices may reference or reuse EMC and radio parameter test data from the application records of a similar device, for test reduction purposes."

In this case, new memory SKU (16G) and model number are different but PCB layout not change from the original EUT (Original FCC: GKR421914).

Therefore, the current EUT (New FCC: GKR436391) was assessed and the data can be reused. Please reference KDB484596 D01 for more information.

All data will be reused except the data of Radiated emission (Before 1GHz).

For more details, please refer to the Reference section and the Spot check sections in the Reuse Data Test Report.

Sincerely,
