	Volume +		Lock screen		Keyboard display
	Power Display				

## Pairing Instructions

- Step 1. Switch On/Off to On to turn your keyboard on.
- Step 2. Press the “Fn + C” keys together to enter pairing mode.
- Step 3. Verify your device’s Bluetooth® settings are on.  
Select Settings - Bluetooth - On.
- Step 4. Select “Bluetooth Keyboard” from your device’s list of available devices to complete pairing.
- Step 5. Select “Bluetooth Keyboard”, the indicator will turn off after successfully paired.

### Notes:

1. Only one device can be actively paired at a time.
2. After a successful pairing, your device will automatically reconnect to the keyboard when it is switched on.
3. In case of connection failure, delete the pairing record from your device, and try the pairing instructions again.

## Charging

1. Plug the Type-C end of the charging cable into the keyboard and the other USB end into your preferred USB charger. (USB charger is not included.)
2. When charging, the power indicator will turn red. Generally, it takes Approximately 2 hours for a full charge. (Output: DC 5 V/500 mA.)

## Sleep Mode

The keyboard will enter sleep mode after remaining idle for 30 minutes. To activate it, press any key and wait for 3 seconds.

## Trouble Shooting

If your device doesn't respond to the keyboard, try the follow steps.

1. Restart your device.
2. Turn your keyboard off and back on.
3. Forget and re-pair your keyboard.
4. If your keyboard doesn't establish or maintain a Bluetooth connection, reset the Bluetooth module by charging your keyboard.

After charging, if your keyboard doesn't operate correctly, please contact our Customer Service.

### **FCC Regulatory Compliance**

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
